

SUGGESTIONS IN SELECTING FACULTY
May 13, 1943

1. In the sixth point of our OUTLINE to General Dalton it says "Each department represents an efficient and enthusiastic group of professors who are ready to put the master plan in operation".

2. Col. Beukema's letter of April 26th said:
" The availability of properly qualified trainness is the limiting factor in such assignments".

3. Col. Beukema speaking to the Representatives of three Colleges said:
" The Army is greatly disappointed with the intellectual training of boys received at West Point, and, is determined to do something about it, even if it means going to the Legislatures of each State".

4. Through The Classification Boards at Each Camp the Army is taking great care to select candidates and place them where they will prove of greatest benefit to the Army.

5. No one knows the length of the Army Specialized Training Program . If the College wishes to participate in the program for as long as it endures, the best effort must be made to have the most efficient men on the staff in order to render the most efficient service.
