'80 Graduates Given Don Quixote Charge—

*“ . . . to dream
a bit . . . ”*

“It is customary for commencement speakers to extol the values of youth and a vigorous start forward. I recommend to you the values of the human spirit: imagination, awareness and vision,” declared Livingston L. Biddle, Jr., Chairman of the National Endowment for the Arts.

Delivering the keynote address at the Providence Civic Center during the college's 62nd Commencement exercises, Biddle urged the 1,141 degree recipients “ . . . to look ahead, to dream a bit, and to develop new ideas and new insights.”

“Your education helps strengthen the fibre and the uniqueness of the individual. That is perhaps education's greatest gift - the development of the eye, and ear, and mind, so that each can achieve full and special potentials of an aware, enlightened, imaginative individual . . . ”

Biddle, a graduate of Princeton University, assumed the position as the 3rd Chairman of the Endowment in 1977. Prior to that, he served as special assistant to R.I.'s Senator Claiborne Pell and Staff Director of the U.S. Senate Subcommittee on Education, Arts and Humanities, which is chaired by Pell. As special assistant to the Senator beginning in 1963, he drafted legislation which led to the establishment of the National Foundation for the Arts and Humanities, under which the Arts Endowment was created. He served as Deputy Chairman of the newly formed Endowment in 1965 and was instrumental in developing the agency's organization and administration.

In closing, the Pennsylvania native advised the graduates “to strengthen your own inner qualities - those special to you, and you will move forward not as pessimists burdened with the complexities of life, but as optimists, ready to overcome whatever the obstacles are.”

Commencement keynote speaker, Livingston L. Biddle

**PC CONFERS 6 HONORARIES:
LEONARD R. WILKENS '60,
JOHN T. RILEY '41 CITED**

During its 62nd Commencement exercises, the college awarded honorary degrees to two alumni and four other prominent leaders in the fields of law, education, music and the arts. Here is a list of the honorary degree recipients with brief excerpts from their degree citations:

□ **Livingston L. Biddle, Jr., Doctor of Fine Arts.**

" . . . You are both literally and figuratively married to the arts and have a deep concern for their humanizing influence. We at Providence College share in this concern. One of our goals is to elevate the spirits of our students to an awareness of beauty and the splendor of its many forms in the arts. Through your efforts, this same goal has been recognized as a vital part of the public good."

□ **Virgil C. Dechant, Doctor of Laws.**

Chosen Supreme Knight of the world's largest Catholic fraternal society in 1977, he has dedicated his business and organizational talents to the service of the Church through the Knights of Columbus. In recognition of his outstanding work on behalf of the Catholic Church, Pope Paul VI named him a Knight of St. Gregory the Great in 1967 and a commander with the rank of Silver Star in the Order of St. Gregory in 1978.

"Your three decades of service to the Knights of Columbus mark you as one who exemplifies the contemporary Church's concept of the lay person who shares fully in her apostolate at many levels. Your business and administrative skills have notably increased the membership and benefits of your great fraternal organization, leading it to a period of unprecedented strength and vigor and bringing its influence to bear upon the challenges confronting family life in contemporary America."

□ **Sister Francis de Sales Heffernan, O.P., Doctor of Education.** A native of New Haven, CT, Sister Francis has served as President of Albertus Magnus since 1974. Despite her vast responsibilities as college president, she has devoted much of her time to civic activities, including the establishment of new apostolic works in Chimbote, Peru and San Juan, Puerto Rico.

"The saint whose name you bear converted many because his life revealed his love of God and man. Likewise, St. Catherine of Siena, a true daughter of Saint Dominic, triumphed over evil times and countless obstacles through the power of her burning charity . . . In you roles as a major religious superior, community leader, and teacher of the young and the not so young . . . you have proven yourself to be, like St. Catherine, a truly valiant woman of God; and, like St. Francis de Sales you have shown yourself to be a true builder, whose visions become realities in the loving service of God and humanity."

□ **C. Alexander Peloquin, Doctor of Music.** Celebrating his 30th anniversary as music director and organist of the Cathedral of Saints Peter and Paul, and his 25th anniversary as composer-in-residence of the University Chorale at Boston College, he has striven consistently to adapt his music to the changing liturgical environment. Last October in Chicago, he had the unique experience of conducting his own music at the historic Mass honoring the visit of Pope John Paul II.

"Across the entire country . . . your creation of a new sound for a new liturgy has carried your music to countless thousands everywhere. As an inspiring teacher, an inspired composer, a master of choral music, and an incomparable organist, you have won an enduring place in the great tradition of the Church's music. And you have not only enriched and revived that tradition but you have also enriched and enlivened all our lives."

*Alumni Honorary Degree Recipients,
John T. Riley '41 and Leonard R.
Wilkens '60.*

□ **John T. Riley, Doctor of Business Administration.** A 1941 graduate of Providence, he joined the pharmaceutical company of Merck & Company, Inc. in 1948, marking the beginning of a long and successful career in the pharmaceutical industry. From 1974-1979, the Fall River, MA, native served as President of Kelco Company, a division of Merck, and in 1979, he was appointed Vice President of the Industrial and Environmental Group, a worldwide health products firm.

"As an alumnus who has risen to the highest levels of management in the pharmaceutical industry, you have demonstrated your concern for the quality of life through the breadth and variety of your involvement with community service activities wherever you have lived and worked. Especially notable, however, have been your concerns for research dealing with marine resources, as well as your contributions to veterinary medicine and the improvement of agriculture. As a civic and industrial leader, you have cared about the life in the seas that surround us and the living earth that sustains us."

(continued on page 6)

□ Leonard R. Wilkens, Jr., *Doctor of Humanitarian Service*. The 1960 alumnus and former All-American guard has brought his many years of basketball experience to the National Basketball Association's Seattle Supersonics. As Coach and Director of Player Personnel, he led the Supersonics to their five-game title triumph over the Washington Bullets last year. He has received numerous awards for civic activities, including the 1979 Whitney Young, Jr. Award by the New York Urban League.

"... all these years you have been a teacher by example not only because of your skill as a truly fine athlete but especially because you have used God's abundant gifts with a caring heart and with strong hands stretched out to the young, the depressed and those very special people for whom you helped to create the Special Olympics."

FOR THE RECORD

The 1,141 degree recipients comprise the largest graduating class in the college's history. 836 undergraduates received bachelor degrees, with business administration (31%) and political science (10%) being the two most popular concentrations, as has been the trend in the past several years. 356 of the undergrads, or 43%, are women - the largest percentage since the college became coeducational in 1971.

The School of Continuing Education awarded 105 bachelor and associate degrees, and the Graduate School conferred 200 master's degrees. No Ph.D.'s were awarded this year.

Of the 836 undergrads, 200 were graduated with honors, which represents 24% of the class. Summa cum laude citations were awarded to 17 students, magna cum laude citations went to 69, and cum laude citations to 114.

Mary Ann Rosseau of North Westport, MA, a history major, was graduated in first place in the Class 1980. A recipient of the Cornelius P. Forster Award for

Excellence in European History. Mary Ann was a member of the St. Thomas More Pre-Law Club and the Phi Sigma Tau national philosophy honor society. She now attends the Cornell University School of Law.

Brian J. Shanley of Warwick, R.I., also a history major, finished second in the class. He participated in the Liberal Arts Honors Program and the Providence-In-Europe Program in Fribourg, Switzerland. A member of the Phi Sigma Tau honor society, Brian is entering St. Stephen's Priory in Dover, MA., to become a member of the Dominican Order of Preachers.

Finishing third in the class was Constance Mary Rosseau, Mary Ann's twin sister. Like her sister, Constance majored in history and was awarded the Cornelius P. Forster Award. A member of the Liberal Arts Honors Program, she served as treasurer of the Phi Sigma Tau honor society. She is attending the University of Notre Dame to pursue graduate studies in Medieval History.

PROVIDENCE NEWS

DOMINICAN CHAPTER AT PC; PROVINCE OF ST. JOSEPH ELECTS REV. EDWARD DALEY

The Very Rev. Edward Raymond Daley, O.P., a Providence native, was elected Provincial of the Dominican Fathers and Brothers of the Province of St. Joseph, during the chapter's elections held on campus in May. Fr. Daley succeeds the Very Rev. Charles T. Quinn, O.P., who served as Provincial since 1972.

Son of Mrs. Gertrude H. Daley of Providence, Fr. Daley was graduated from La Salle Academy in 1943 and attended Providence College until 1945, when he left the college to enter the Dominican Novitiate of St. Rose Priory in Springfield, Kentucky. He continued his studies at St. Joseph Priory and the House of Philosophy in Somerset, Ohio, and the Dominican House of Studies in Washington, DC, where he received the degrees of Bachelor and Lector of Theology.

He was ordained a priest on June 12, 1952, at St. Dominic's Church in Washington, DC. Following his ordination, he was sent to Rome for further study, where he received a Doctorate in Canon Law (JCD) from the Pontifical University of St. Thomas Aquinas in 1956.

From 1956-1976, Fr. Daley held the position of secretary and socius to the Provincial, and in September, 1977, he was named pastor of Holy Innocents Parish in Pleasantville, New York. He also served as judge in the Marriage Tribunal of the Archdiocese of New York, from 1968 to 1976.

Shortly after the Provincial Elections at Providence, Fr. Daley's position was officially confirmed by the

Master General of the Order in Rome.

Fr. Daley attended a meeting of all major religious superiors in the U.S. this summer in Texas, and in September, he will travel to Walberg, Germany to participate in an international meeting of all Provincials of the Dominican Order.

In addition, the Order of Preachers is establishing a new Dominican Province in the southern U.S. The newly-formed southern province, which was proposed by the Councils of St. Joseph's and St. Albert's Provinces will incorporate the states of Florida, Georgia, North and South Carolina, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma and Texas.

Providence College officially broke ground for the new \$5 million fieldhouse and recreation center on July 11. The two level, 88,000 square-foot building, which was designed by The Robinson, Green and Beretta Corporation, will include a 25-meter swimming pool, an indoor running track, 7 racquetball courts and five multi-purpose courts for tennis, basketball and volleyball. The Contracting Manager, Bailey Building Company, projects completion by September '81.

1979-80 Loyalty Fund Roars Past Goal Record \$594,063 Given by 7,405 Donors

The recently completed 1979-80 Loyalty Fund is not only the first to top the half-million dollar at Providence College but in doing so continued to rip apart past Fund records and again increased at a rate that maintains P.C. among the leading colleges and universities for growth in alumni giving.

1979-80 Fund Chairman Francis L. Gragnani reports that this year's Fund realized \$594,063 from 7,405 contributors thereby topping its \$525,000 goal by \$69,063 and last year's previous record of \$470,993 by \$124,070. Included in the overall totals are \$468,001 from alumni, \$32,707 from non-alumni parents, \$54,805 from corporations, \$28,173 from friends, and \$10,379 from non-alumni faculty/staff.

Chairman Gragnani and Associate Vice President for Development William T. Nero, who is charged with responsibility for all of the college's fund-raising programs, were extremely pleased over the final results. They noted that each of the major committees - alumni, parents, corporations, friends and faculty/staff - surpassed last year's committee results as well as this year's assigned quotas. Each of the special gift committees - Incorporators, Associates, President's Chancellor's, Dean's, and Century Club - also exceeded their goals, and the efforts of regional and class committees led the fund to a new high in alumni participation.

Father Thomas R. Peterson, College President, credited the fund's success to an outstanding effort by Chairman Gragnani, other Loyalty Fund Leaders, the Development Staff, the hundreds of volunteers and thousands of donors who unselfishly offered their time and support. "We are extremely grateful to Chairman Gragnani and all those who worked and contributed to this year's Loyalty Fund. This was an outstanding effort and all who contributed their time and finances to this year's successful fund should be proud of the role they

William T. Nero (center), Associate Vice President for Development, accepts the CASE Award for Alumni Annual Giving.

have played in P.C.'s continued development."

Approximately 41% of the alumni solicited, or 6,642 alumni donors, contributed to this year's campaign, which is not only a record for Providence College but is more than double the 16% average alumni participation rate for all colleges and universities. P.C.'s alumni participation percentage is even more outstanding when the relative young age of the college and the fact that about one half of the alumni solicited graduated during the past twelve years.

Chairman Gragnani expressed much satisfaction over the total results but especially over the alumni participation rate, explaining: "We're a very young school in comparison to older, established universities such as Notre Dame, Brown, Harvard and others. We have an imbalance in numbers in that our recent classes are so much larger than our earlier years and because of our tradition of educating students from lower

ALUMNI ANNUAL GIVING PROGRAM RECEIVES NAT'L AWARD FOR EXCELLENCE

Citing a marked increase in both alumni donors and contributions during the last four years, the Council for the Advancement and Support of Education (CASE) has declared the Providence College Alumni Annual Giving Program an award winner. This represents the fourth consecutive year that the college has been selected as a finalist in this program.

Sponsored by both CASE (a Washington D.C. based organization of more than 2,000 college and universities) and the U.S. Steel Foundation, the Alumni Giving Incentive Program, now in its 22nd year, seeks to recognize institutions and their alumni that have made a significant commitment to encourage private, voluntary support for education.

Under the direction of William T. Nero, Associate Vice President for

(continued on page 10)

(continued on page 10)

and middle-income families, we don't have a large number of wealthy alumni to draw upon. But I certainly wouldn't trade the loyalty and devotion for Providence College with other schools. Our record of support is simply fantastic when all factors are considered. For example, our first class of 1923 participated at 100%, the vast majority of classes through 1961 achieved 50% participation, and even our most recent class, 1979, bettered the national average by 7%. And look at the performance of our golden anniversary class of 1930 and silver class of 1955. The Class of 1930 in raising \$5,905 this year more than tripled what it raised last year, and the class of 1955, in raising \$29,571, contributed more than any class has to date given to the Loyalty Fund. In an economically unfavorable year, the support received from all quarters - alumni, parents, friends, faculty, staff, and corporations - has been outstanding. And I am pleased not only at this year's results but also because I know that Providence College will continue to receive the improved support it needs in the years ahead because it is deserving of our support, has an excellent development staff, and many willing and loyal volunteers, and because its alumni and others recognize the value of P.C.'s high quality education."

The 1979-80 Annual Fund reports for other colleges and universities will not be available for several months, but it is deemed highly unlikely that many can match Providence's outstanding performance in alumni giving over the past several years. In fact, Providence College was recently cited by the U.S. Steel Foundation and the Council for the Advancement and Support of Education (CASE) for outstanding sustained performance in alumni giving. Between 1973-74 and 1979-80 fiscal years, Providence has increased from 25% participation to 41%. The rates for a sampling of other schools taken from CASE Reports for the 73-74 and 78-79 fiscal years are as follows: Boston College (19%-22%), Catholic

U. (12%-9%), Clark U. (34%-35%), Fordham U. (5%-13%), Georgetown U. (15%-24%), Holy Cross C. (34%-47%), LaSalle C. (Unk-13%), Manhattan College (27%-22%), Notre Dame U. (59%-53%), R.I. (22%-25%), San Francisco (15%-12%), St. John's U. (1%-6%), St. Joseph C., Phil. (5%-19%), St. Louis U. (13%-12%), Tufts U. (20%-27%), and Villanova U. (21%-20%).

Gragnani was also very pleased at the improvement in giving recorded by non-alumni Groups. Parents increased from \$26,510 last year to \$32,707 this year, faculty/staff from \$9,251 to \$10,379, and under the leadership of Joseph W. Ress, corporations went from \$16,310 to \$54,805 and friends from \$17,812 to \$28,173.

Also cited by Gragnani and Nero for exceeding a 50% participation rate were the following alumni committees: New Bedford - 65%, Washington, D.C. - 56%, Hartford - 54%, Western Mass. - 53%, Illinois - 53%, Northern New Jersey - 52%, Philadelphia - 50%, and the classes of Honorary through 1943, 1946 through 1950, 1954, 1955, and 1961.

The Final Report for the 1979-80 Loyalty Fund is now being printed and is expected to be mailed to members of the Providence College family within the next few weeks.

Development, the Providence College Loyalty Fund Campaign has won the award in the highly competitive Sustained Performance Category. Providence College has had to show an increase in alumni donors and contributions in the last four years to qualify for this honor.

Several years ago, Providence College won the CASE Award in the improvement Category for recording the greatest increase in donors and dollars among private colleges over the preceding years.

In each of the last four years, Providence College has established a new record of annual giving. Under the chairmanship of John F. Capaldi '52, President of Capaldi Brothers Construction Corporation, the 1975-76 fund totaled \$181,148 from 3,781 alumni donors. The following year, chairman Richard A. Riley '37, Chairman of Firestone Tire & Rubber Company, closed out the campaign with a total of \$290,499 from 4,845 alumni donors. Joseph B. McCarty '40, President of Rennie Curtain Manufacturing Co., Taunton, MA, assumed chairmanship from 1977-79, and under his leadership, the number of alumni contributors rose to 6,277 totaling \$401,110. In this same period, alumni participation rate in the fund has risen from 26% to 40%, a significant rate when compared to the national participation average of 16% for all schools.

Along with the increase in alumni donors and total contributions the last four years have also seen a significant increase in the Special Gift level, which represents alumni donations of \$100 or more. The 1975-76 fund realized a total of \$102,654 from 537 gifts. Last year that figure increased to \$327,415, from 1,347 gifts.

Regional, Class and Special Gift Phonathons have been an integral part of the annual solicitation program, with over 800 volunteers participating in these phases of the campaign.

The award was presented at the Annual CASE Convention held in Detroit, Michigan during July.

PC LAUNCHES 1st DIRECT EXCHANGE PROGRAM: TWO JUNIORS STUDY IN JAPAN

Two Providence College juniors departed recently for Japan, to participate in a one-year exchange program at Kansai University of Foreign Studies in Osaka, Japan. In exchange, Kansai University will send one Japanese student to study at Providence College in the 1980-81 academic year, followed by a second student in the 81-82 academic year. This agreement with Kansai marks the first such direct exchange program offered at Providence College.

Erin O'Toole of Scituate, RI and Susan Lind of Foxboro, MA will participate in the Asian Studies Program at Kansai, a program which was initiated in 1972, and is designed to meet the requirements of undergraduate students from abroad. To date, over 600 students representing some 80 college and universities have participated in the Kansai exchange program.

The Asian Studies Program at Kansai provides students, with no previous training in Japanese, an opportunity to obtain first-hand knowledge of Far Eastern culture. Most of the faculty are Japanese and have had teaching experience in the U.S. or Europe. The university offers courses in Asian studies, conducted in English, for the benefit of those students whose knowledge of the language is inadequate, but who are anxious to understand Japanese culture.

O'Toole and Lind will begin the program with one week of cultural orientation prior to the commencement of formal instruction. Both students will take 32 weeks of courses during the academic year, ranging from spoken and written Japanese to Oriental Thought and Religion, Japanese Psychology and Government, Politics and Foreign Relations of Contemporary Japan. Credits for work completed at Kansai will be transferred to Providence College according to the usual policies of the college.

Miss Lind, an international

economics major at Providence, visited Japan last summer as part of the Youth for Understanding Exchange Program. She will live in a dormitory on the Kansai Campus, while Miss O'Toole, a business finance major, will live with a host

Japanese family.

Situated in the heart of the Kansai region, the university is accessible to Kyoto and Nara, the religious and cultural centers of traditional Japan and to Osaka, the industrial metropolis of modern Japan.

Fr. Peterson bids farewell to juniors Susan Lind (left) and Erin O'Toole, who are participating in the Japanese Exchange Program this year.

1920 ALEMBIC 1980

The Providence College Literary Journal

60th ANNIVERSARY ISSUE

In celebration, submissions are open to all alumni and friends of PC. Poetry, short stories and essays accepted. Send to: ALEMBIC, Box 3501, Providence College, Providence, RI 02918. Deadline: October 1, 1980.

If you would like to receive a copy of this anniversary issue, send a check or money order for \$5 to the ALEMBIC office by October 1. Please include your name and address.

FACULTY PROFILE

OF MICE AND MATTER

What can a small, private, New England college do to prepare its science majors to compete with graduates from schools like Holy Cross and Boston College?

Perhaps, it can offer its students the opportunity to perform experimental tests, to correlate data, and to discuss results of a specific project. It can also afford them the opportunity to learn totally new laboratory techniques, not otherwise taught in structured courses.

How does this come about? By student participation in research projects under the direction of members of the science faculty — like Dr. James F. Belliveau of the Chemistry Department, and Dr. Gerard P. O'Leary of the Biology Department. These gentlemen work (both collaboratively and independently) with as many as 14 science majors, offering them the opportunity to work in all phases of scientific experimental research.

Shortly after Drs. O'Leary and Belliveau came to P.C., they began working on small research projects involving undergraduates who received academic credit for their work. One of the first projects Dr. Belliveau undertook was a study in experimental physical chemistry.

At the same time, Dr. O'Leary began working on a limited basis with undergraduates in Marine Microbiology on a project involving bacterial toxins.

About 5 years ago, Dr. O'Leary, while working with undergraduates on a muscle contraction project, ran into some problems which involved physical chemistry. Dr. O'Leary asked Dr. Belliveau to work with them on this project and their first collaborative research project was underway. Their combined work in this project resulted in Dr. O'Leary being invited by the Japanese/American Inter Microbiological Conference to speak in Honolulu. This work also led to an article which has been accepted by the *Journal of Chemical Education*.

Dr. Belliveau's interest in biochemistry prompted him and his research assistant, Binh Nugyen, to work with Dr. O'Leary and undergraduate Erica Green, who were studying the development of the arthritic condition. Binh was able to develop a separation procedure using high pressure liquid chromatography. This project was then turned over to two undergraduates, Dave Tschaen

'80, and Karen Ferrante '80. Karen and Dave presented this newly developed technique at a conference in Houston, Texas. Dr. Belliveau also presented a paper at this conference.

While working with their students on this study, Drs. Belliveau and O'Leary attended a meeting at the University of Maryland where they met and became associated with Col. James Vicks, who was already studying osteoarthritis in dogs. They also met Maj. Jergen Von Bredow of the Department of Therapeutics, Walter Reed Army Medical Institute, who invited them to Walter Reed to demonstrate the analysis procedure for separating serum steroids which had been developed by Binh, Karen and Dave.

Drs. Belliveau and O'Leary had also begun research work with a local doctor who was involved with the Clinical Chemistry program here on campus. From this association, Dr. Belliveau and Dr. William Griffiths of Roger Williams Hospital developed a research project on drug binding to test for jaundice in babies.

Presently, Dr. O'Leary has applied for a senior fellowship from the National Institute of Health Cancer Institute which will enable him to work at Roger Williams Hospital with Dr. Paul Calabrese, Chairman of the Department of Medicine and Experimental Oncology and Dr. Daniel Dexter. This project resulted from O'Leary's work with George Matook '79 who is presently employed at Roger Williams as a research assistant investigating gastrointestinal cancer.

Dr. O'Leary has just completed a half year sabbatical to work on staff at St. Joseph's Hospital, Department of Pathology to study muscle-like systems in primitive organisms with Dr. Salvatore Alegra.

Undergraduate students are also involved in non-collaborative projects of Belliveau and O'Leary. Dr. Belliveau is working on an industrial project for Texas Instruments which involves the analysis of 20 elements using the plasma emission spectrograph. The results of his work in this field have been presented at a conference in Puerto Rico. He is beginning a project involving Dr. O'Leary and undergraduate, Peggy Lalor '81, to study the possible use of the plasma emission spectrograph for medicine research.

Student Scientists Reap Benefits Of Cooperative Research Program

Both Drs. Belliveau and O'Leary are presently involved in a project with Chemistry Instructor, Mary Blasik and biology major, Alice Brochinsky '82, to study the fractionation of separation of components of venoms for possible medicinal uses.

They are also actively involved in trying to interest other colleges to establish undergraduate research programs. A symposium was held on undergraduate research here at P.C. by the New England Association of Chemistry Teachers in March. Dr. Belliveau presented a talk on the pros and cons of undergraduate research even on the high school level. This resulted in an invitation to speak on this topic at the regional meeting of the American Chemical Society in November of 1980.

In April, Belliveau and O'Leary and seven students attended the 34th Annual Eastern Colleges Science Conference in New York at which time Dr. O'Leary was elected coordinator of the ECSC and is in the process of developing a journal of undergraduate sciences.

The research program has proved to be beneficial and enjoyable for both the students and faculty members involved. While faculty members are not paid for their research work, Dr. O'Leary feels that he has gained personally and professionally from this experience. O'Leary said, "I feel I have the knowledge and satisfaction of seeing students who are better prepared for biomedical careers."

The students are also enthusiastic about their involvement with the research program. Kimberly Carter '81, feels that she, "has been exposed to developments in sciences other than just my major. I don't think that many professors in other colleges would spend the time with students that Dr. Belliveau and Dr. O'Leary do." Alice Brochinsky '82 also feels she has the opportunity to study many areas of science and, "there is no high pressure in the research program, it is a teaching atmosphere. If you make a mistake you are encouraged to discover where you went wrong and correct it. You have a lot of independence yet everyone helps each other."

So, what can a small, private, New England college do to better prepare science majors . . . Plenty!

FACULTY NOTES

Edward L. Hunt, O.P.
1904-1980

Peter J. Bongiorno and **Frederic G. Eichhorn**, both of the Business Department, co-authored an article entitled "Keeping a Second Set of Books - Legally," which was published in *Management Accounting*. The article investigates the use of a dual purpose data base for preparing both financial and tax statements.

Charlotte O'Kelly of the Sociology Department was awarded a National Endowment for the Humanities Summer Fellowship to participate in a seminar at Brown University on Comparative Religious Ethics. She has also authored a book, *Women and Men in Society*, which is now in print.

The Mathematical Society of America has selected **Dr. James Tattersall** to join its panel of visiting lecturers and consultants for the 1980-81 academic year. Funded in part by the Walter B. Ford Lecture Fund, the program seeks to strengthen and stimulate mathematics programs in two-year colleges and those four-year colleges not offering a Ph.D. program in mathematics.

Carl D. Baer of the Chemistry Department has been promoted to the rank of Assistant Professor. He received his Ph.D. from Brown University this past June.

Gerard O'Leary of the Biology Department and **James Belliveau** of the Chemistry Department collaborated on an article entitled "A New Assessment of Bilirubin Binding to Serum Albumin" which was published recently in *Chemical Chemistry*. **Dr. O'Leary** also participated in a collaborative study focusing on *Fish Species Identification By Thin Layer Polyacrylamide Gel Isoelectric*, published in the *Journal of Analytical Chemistry*.

Lydia T. Black of the Anthropology Department has been awarded a Visitor Scholar Fellowship by the Kennan Institute for Advanced Russian Studies, Woodrow Wilson International Center for Scholars. Dr. Black has also translated the personal journals of Father Yakov Netsvetov, the first Russian Orthodox priest of the Aleutian Islands, in a book that is due for publication this summer.

John K. Primeau of the Modern Languages Department received a grant for Summer study and travel in Germany, sponsored by the HEW Department, the U.S. Office of Education, the Goethe Institute and the German Embassy. He is enrolled in a course which investigates the recent innovations in the modern German novel of the 70's, by means of discussions, seminars and actual dialogues with the authors.

Judith Jamieson, Assistant Dean of the School of Continuing Education, participated in a conference for middle management women in higher education entitled "Networking: Issues and Strategies." The program, held at St. Lawrence University (NY) conference center, focused on women administrators as leaders and managers with emphasis on the creation of professional networks to supply on-the-job information, to assist with staffing needs and to support individual career objectives.

Sister Helen O'Neill, O.P., assistant professor of Religious Studies, directed the sixth annual Biblical Institute at Sinsinawa, Wisconsin in June. Five biblical scholars joined Sister Helen in lecturing to more than 200 participants in the Institute. The theme of the lectures was "Focus on the Gospels." Father Thomas Aquinas Collins, O.P., was also a member of the Institute faculty.

The Reverend Edward L. Hunt, O.P., former chairman of the art department and professor at Providence College for 44 years, died July 16 in Providence. He was 76.

Fr. Hunt was an alumnus of Catholic University in Washington, DC, where he received a B.S. degree in 1925, and a Ph.D. in Architecture in 1928. He was ordained a Dominican priest in Washington, DC in 1935, and joined the PC faculty a year later.

During his long and distinguished career as priest-educator, Fr. Hunt taught courses in mathematics and art. His efforts in expanding the course offerings in art led to the establishment of the art department at the college in 1970. He was named first chairman of the department, a position he held for eight years.

In 1978, Fr. Hunt was awarded the "Begley Faculty Award," by the college's national alumni association. Named in memory of the late Very Reverend Aloysius B. Begley, O.P., former Director of Athletics and Alumni Chaplain, the award is given for outstanding service to the college by a faculty member.

Father Hunt lectured extensively in New England, and was affiliated with many scholarly organizations, including the Society of Art Historians, the Eastern Arts Association, and the College Art Association.

Born in Richmond, Virginia on May 6, 1904, he was the son of the late Patrick T. and Margaret (Meredith) Hunt. He is survived by a cousin Mrs. John F. Keith, of Richmond, VA.

PROVIDENCE COLLEGE

Providence, Rhode Island 02918

Office of Admissions

Dear Alumnus:

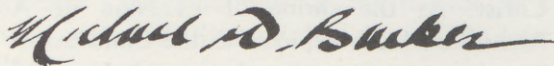

Please accept my appreciation in behalf of the Admissions Office for your support in recommending qualified applicants to Providence College. Your assistance has been most gratifying and has contributed, in large measure, to the record total of applications processed during the past year.

The Admissions Office has prepared a "Student Referral Card" which you may use to recommend relatives, friends, or neighbors who might benefit from the advantages of an education at Providence College.

For your insight in recommending students, you will be pleased to know that 83% of the freshmen class ranked in the top two quintiles of their high school class and had median College Board scores of 1030.

I look forward to hearing from you and extend sincere thanks for your continued support and loyalty.

Best wishes,

Michael G. Backes
Director of Admissions

THE PLEASURE WAS MAYAN

by Sr. Leslie E. Straub, O.P.

As a graduate student at the Catholic University of America, I was advised to "keep the people in mind" when undertaking an anthropological expedition. I was still strongly impressed by that advice when I traveled to Guatemala and Honduras last January, under the sponsorship of the Peabody Museum of Archeology and Ethnology of Harvard University. Although 15 years of studying and teaching in the field of Latin American cultures had prepared me for what I hoped to learn from the visit, I found that my expectations were surpassed.

The Guatemalans were exceptionally friendly, courteous and helpful. Men, women and children graciously assisted me in finding my way as I traveled alone through their cities and towns. They answered many questions, and probably without realizing it, challenged some of my preconceived notions about them and their way of life. Meeting these people in their own setting left me with more questions than I had thought of before putting my foot down on Central American soil.

An anthropologist usually has one specific goal in mind when going into another cultural area; I wanted personal exposure to people and cultures I had only studied about 'at a distance.' I had visited the Yucatan Peninsula and Central Basin of Mexico earlier; now I welcomed the opportunity to concentrate on the Guatemalan and Honduran sectors of the area occupied for centuries by the Maya Indians, who now approach the three million mark in population. Within that context, I was interested in the religious pilgrimages undertaken by the Maya and their Ladino and Euro-American neighbors.

The religion of the Maya today is characterized by a blending of their ancient beliefs and rites with those of Catholic Christianity introduced by the Spaniards in the eighteenth century. The custom of making pilgrimages was common to both the Indians and Europeans, and it continues to be a practice in which a fusion of religious beliefs is discernible. Some Catholic pilgrimage centers are located near the sites of shrines which were sacred to the Maya before the Conquest; and some aspects of the belief prompting a given pilgrimage may be as diverse as the skin color, dress, language, or socioeconomic rank

of these worshipers, who can be seen lighting candles before images of Christ, His Mother and the saints. The statues themselves are clothed in the Spanish colonial dress of the rural peasantry or aristocratic nobility, and the visage is Indian, Black or European, depending on the locale.

At each of the three pilgrimage sites I was able to visit, I found that pilgrims direct their devotion primarily to Christ. However, at the shrine of Santo Cristol de Esquipulas, He is the Crucified Christ, and at the shrine of Jesus Sepultado in San Felipe, He is the Entombed Christ. At the shrine of El Nino de Atocha in Amatitlan, He is depicted as the Child Christ - a little boy sitting on a wooden chair and holding the world in His hands. He is garbed in a blue dress, the front of which is covered by what looks like a large white bib. The sacred images are housed in very different structures: a grand, eighteenth century basilica in Esquipulas; a small, one-room, cinderblock building replacing the church badly damaged by the earthquake of 1976 in San Felipe; and, in Amatitlan, a seventeenth-century church likewise damaged by that earthquake, but still standing. Distinctive customs are also associated with each pilgrimage site. For example, pilgrims, returning from Esquipulas, adorn their straw hats with artificial fruits and flowers and deck their vehicles with colorful garlands of artificial pine needles.

Although there were differences at each site, there were also discernible similarities. Well dressed and poorly dressed worshipers prayed with visible signs of fervor at both basilica and simple chapel. It was noticeably quiet inside the sanctuaries, and because of the Blessed Sacrament's presence I felt very much at home with the Indians, Ladinos and anyone else who came to worship.

Between visits to the pilgrimage sites, I traveled with the group to the ruins of the Classical Maya centers of Quirigua, Copan (Honduras) and Tikal, and then to the Midwestern Highlands. The visits to these archeological sites entailed physical hardships such as extreme heat and humidity, the lack of pure drinking water, and long rides over rocky, dirt roads. But this discomfort was small payment for the opportunity to roam through the Great Plaza and Acropolis at Copan, to examine huge

A ruined church undergoes repair in San Felipe.

stone slabs (stelae) on which the Maya carved significant dates and figures in Quirigua, and to spend a day dwarfed by the rain forest and pyramids of Tikal.

The Midwestern Highlands offered a cool climate and a magnificent terrain, marked by volcanoes and Lake Atitlan. We had valuable time to spend among the Maya of Cakchiquel, Tzutuhil, and Quiche linguistic groups. Our base was the Ladino sector of Panajachel, on Lake Atitlan. Panajachel is a charming little town that serves as a mecca for tourists. There, during a leisurely stroll through the side streets, I found a bit of the Providence College campus: a sign outside of a small tavern read, "El Ultimo Refugio" — "The Last Resort."*

Chichicastenango is a short distance from Panajachel. I was very anxious to visit the town for two reasons. First, I had studied and taught from Ruth Bunzel's monograph, *Chichicastenango*, in which she describes the ritual life of the Quiche Maya in rich detail. Second, it was Rev. Francisco Ximenez, a Dominican, who first translated into Spanish the *Popol Vuh*, which relates the origin and early history of the Quiche.

Our lecturer during the trip, Dr. Evon Z. Vogt, Professor of Anthropology at Harvard University, had wanted us to visit "Chichi" on a non-market day so that there would be few visitors there and so that the ritual activity which we hoped to see would be carried out by the Indians for themselves. One of the most rewarding experiences was trekking with Dr. Vogt at a great pace over hilly, cobblestone streets, to the plaza to watch the dancing and processions in honor of Santo Tomas; into the church to observe the ceremony there; then, with two little Indian girls to guide us, up the steep trail to the top of the mountain where the Maya worship at the shrine of a stone idol called Turq a; then down to the courtyard of a house where the statue of the saint would be kept by the head of a religious brotherhood; and then up again to find the Indian section of the cemetery. It was exciting even though I shared his frustration at not being able to see one ritual through to the end in order that we might gain a sense of the whole of people, place and activity.

*The Last Resort is a coffeehouse located on PC's lower campus.

Sister Leslie Ellen Straub, O.P., Ph.D., is Director of PC's Anthropology Division in the Department of Sociology, Anthropology and Social Work. An Assistant Professor of Anthropology, Sister is engaged in research on the Guatemalan pilgrimage sites and hopes to return to that country to continue her investigation.

Although the Indians of "Chichi" were friendly and courteous, we knew that we were outsiders. For example, when the corn gruel was distributed, as is customary in sacred rite of drinking in honor of the saint, it was not offered to us. Also, we were not permitted to enter the church of Santo Tomas by the front door.

The last part of the trip was spent in Antigua, a city whose Spanish colonial character has been carefully preserved. In 1566, Antigua received the title "Most Noble and Loyal City of St. James of the Knights of Guatemala," which matched its imposing position as capitol of the Kingdom and Captaincy-General of Guatemala. The present capitol of the nation of Guatemala, Guatemala City, might never have supplanted Antigua had it not been for the earthquake which left much of the old city in ruins. The remains of such structures as the Cathedral, San Francisco Church, San Carlos University, and the Convent of the Capuchin Nuns, suggest the splendor of the colonial city of St. James of the Knights. I had been sorry to discover that the Church of Santo Domingo had been so badly damaged by the earthquake that it no longer served as church, convent or priory. To my delight, I learned that archeologist Dr. Edwin Shook was in the process of restoring part of the original convent of Santo Domingo.

This account opened with an admonition and will draw to a close with another: "Woe betide the observer who confuses 'the picturesque' with poverty." I remind myself, first of all, that being interested in someone's way of life, past and present, means caring about all of it. Amid the splendid and lovely scenes and events, there were many instances of people suffering from poverty, hunger and disease. There were still evidence of the crippling effects of the last earthquake and the threat of volcanic eruption persists. There were signs, too, of political and social unrest.

It will take a long time to reflect thoroughly on my experiences: to perceive relationships, to formulate new questions and to sift fact from fancy. Meanwhile, I hope that our students, as well as myself, may become just a bit richer for having wondered about - and wondered at - the culture, history and vitality of our Guatemalan and Honduran neighbors.

SIDELINE CHATTER

OLYMPIANS HONORED IN ALUMNI HALL AMID MIXED BOYCOTT REACTION

Dave Gavitt will be the answer to a good trivia question years from now. Like "Who was the 1980 U.S. Olympic basketball coach, the coach of the team that DIDN'T go to the Olympics."

Well, the 1980 Moscow Olympics are now history. The national anthem was never played with the U.S. players up there on the podium receiving their gold medals. That honor, instead, went to the Yugoslavs with the Russians not even making it to the Gold Medal game.

Anyway, Gavitt DID COACH the Olympians, who did get some publicity by playing six games — five against NBA players and the finale against the '76 Olympic team — and the team won five of those games. The lone loss was by two points.

With the absolute flop of the Russians on their own court — first to Italy and then to Yugoslavia — and with the way the U.S. team played (so well and with such intensity and spirit) against the pros, there perhaps isn't any question that the U.S., under Gavitt would have brought home the gold.

Instead, Gavitt and his staff and 12 players, with all the Olympians from all of the other sports in this country, had to settle for "special" gold medals at a big bash in Washington hosted by President Carter and the government at the Capitol and the White House. Maybe it wasn't the same as the "real" gold medal, but no one complained.

Anyway, the Olympics are over — in Moscow and in the U.S., the six-game tour the U.S. basketball team enjoyed and then the big reception in Washington. For Gavitt and his team, there will still be a lot to look back upon.

After President Carter announced plans of the boycott, Gavitt said the options for U.S. Olympic basketball were quite simple: "either fold our tent, or develop quickly a program geared to provide both recognition and competition. After conversations with many potential candidates, we chose the latter. It was clearly the right choice. We all felt it was imperative to go on. And we got to play against the best players in the world — the NBA players."

So. Gavitt and the Olympic people went ahead with the trials and came up with a 12-man team. Some can argue that it wasn't the best possible team because some of the college seniors didn't try out due to pressures from agents regarding the pro draft, and also because there would be no Moscow. Eight seniors did try out (two were picked, Michael Brooks of LaSalle and Bill Hanzlik of Notre Dame), but only nine tried out in 1976.

And Gavitt was surprised at the reaction of the players who did try out, and those who made the team, in regards to not getting the chance to play in Moscow.

Brooks told everyone that it was a life-long dream to become an Olympian and was "happy as hell just to get a chance to say I made the team and have the honor of wearing USA on a shirt across my chest."

Hanzlik passed up his graduation at Notre Dame to attend the trials and later said "I know we're not going (to Moscow). There's no way we're going to go. But I've played against the Russians four or five times, and I know they're the second best team in the world. I've played in China, Yugoslavia and Argentina. No one could beat this team. If we took this team to Moscow, we'd win."

After the trials, the team came to Providence College for 10 days of workouts, then 10 more days in Colorado Springs. While at PC, the team played two exhibition games against a group of former New England collegians, led by Ernie D., Kevin Stacom and Soup Campbell. One of the games was in Alumni Hall, the other at the Hartford Civic Center.

Alumni Hall was packed to the rafters and hundreds were turned away on a warm, muggy night in June. They came to see Kevin and Soup and especially Ernie D., but they also came to salute and see the Olympians. In unison, the big crowd roared "U.S.A., U.S.A., U.S.A.," just as the big throng did at Lake Placid when the U.S. beat the Russian hockey team.

"I didn't know what to expect before the game," said Gavitt. "I didn't even know if we could fill the gym. It was real nationalism. The country doesn't feel good about itself and it is looking for something. The country needs to feel good about their kids and these kids deserve it. They played with enthusiasm despite the boycott."

The receptions on their six-game tour weren't as spontaneous, nor as over-whelming, as the one in tiny Alumni Hall, but the Olympians and

PROVIDENCE COLLEGE

celebrates the past . . . challenges the future.

I. INTRODUCTION

"(Providence College) has brought about since its founding, a social revolution in Rhode Island . . ."

To characterize Providence College is a difficult task. Even a casual walk around the campus gives evidence of its diversity and complexity. It is an institution of higher learning charged by its founders with the teaching of truth both secular and sacred. It is a recognized force in the community which in the words of Senator John O. Pastore, "Brought about since its founding, a social revolution in Rhode Island." It is a Dominican presence made possible by the dedicated efforts of our Fathers, Brothers and Sisters which has directly influenced the lives of thousands upon thousands of our students and alumni. It has rendered and continues to render significant service to both civil and ecclesiastical authorities. In a word, the mission of Providence College might best truly be described as an "apostolate."

This apostolate has grown and prospered during its more than sixty years of existence. We pray that with God's help, it will continue to do so. The College, as indeed the Church itself, has had to adapt to changing times, but its essential commitment has remained the same.

The following report will attempt to outline for the members of the Providence College Community, a description of Providence College and its work at the present time.

II. PHYSICAL FACILITIES

"The challenge of the energy crisis will become more and more pressing during the coming years."

The campus of Providence College is located on a tract of land approximately 104 acres in size and has 29 buildings. Of these, 10 are student dormitories. The others are used for various academic, administrative, recreational or residential purposes.

About five years ago, the College acquired the Chapin Hospital property which is adjacent to the main campus. The property contained 10 buildings, one of which was a small building in poor repair which had to be torn down. The other buildings were found to be structurally sound by an engineering study and all but one have since been converted to meet the various needs of the College. Two of the buildings are dormitories. Another was converted into a much needed office building which provides individual offices for 64 members of the faculty. Still another building serves as a Fine Arts Center with special studios and other facilities needed by the Art Department. One building has become a Music and Theatre Arts building and was recently named in honor of St. Catherine of Siena during a celebration at the college honoring the 600th anniversary of her death. Another building serves as a student recreational center, and another, through the generosity of one of our benefactors has been converted into a Business building with special classrooms, offices and other facilities for the use of a rapidly growing Business Department. This past year, this building was named Koffler Hall, in honor of the family of benefactor Sol Koffler.

Part of the Chapin property, now known simply as "the lower campus" has been turned into much needed athletic fields.

The challenge of the energy crisis will become more and more pressing during the coming years. Many of the older buildings on the main campus were built in an era in which energy efficiency was not looked upon as a high priority. They are in need, therefore, of much additional insulation. The windows and outside doors of some of these buildings are in need of weather-stripping or replacement. The windows in Harkins Hall are an example of the latter. We have received a \$120,000 matching grant from the State to assist in this project.

Some limited new construction is also foreseen for the future. The Corporation has authorized the construction of a new Field House or Recreation Center. This building will be geared specifically toward intramural sports. The groundbreaking for this structure took place during July of this summer. The need for this building can be seen from the fact that last year over 2,500 students participated in these activities. Our present gymnasium was built at a time in which we were an all-male institution and had a resident population of about 900 students. Since 1971, we have become a coeduca-

tional institution, and we now have over 1,800 students living on the campus. Alumni Hall has, therefore, become quite inadequate to meet our current recreational needs. The projected date of completion of the structure is September of 1981.

A feasibility study is also being carried on concerning the possible construction of a theatre. This building would be used not only for productions put on by the Theatre Arts Program, but it could also be used for recitals presented by the Music Program, as well as for lectures, films, concerts, and other cultural events.

There is the possibility that a benefactor of the College may finance the construction of an Art Gallery for the use of the Art Department. This matter is now under study.

Another building that is badly needed, and has been for many years, is a Dominican Faculty House. Many of the Fathers and Brothers, particularly those who live in Harkins Hall, have living quarters that are very inadequate. Unless a faculty house can be built in the foreseeable future, major and very expensive repairs will have to be made to the fourth floor of Harkins Hall.

III. ENROLLMENT

"There seems to be no doubt that competition for qualified college students will intensify in the years to come."

At the undergraduate level, Providence College is about as large as we would like it to be. Various studies which have been carried on indicate that because of the decline in the population throughout the country, the number of students applying to colleges and universities in the years to come will diminish. It would seem naive to think that Providence College would not be impacted to some degree by this situation. At present, however, our enrollment has remained quite constant. As a matter of fact, we have received more applications for enrollment this fall, than were received a year ago.

We are projecting the size of the Class of 1984 to be between 850 and 900 students. The total undergraduate enrollment for the 1980-81 academic year will be approximately 3,400. We anticipate about 3,000 registrations in the School of Continuing Education which amounts to a full time equivalency of 1,565 students. We also expect that there will be about 625 Graduate Students enrolled in September.

We do not anticipate that the undergraduate enrollment will increase over the next five to ten years. As was mentioned above, there is every reason to believe that this enrollment figure will decrease somewhat. There are some factors that might well lessen the enrollment decline. Studies indicate that the private sector of Higher Education in the United States will probably be less impacted by enrollment declines than will the public sector. The second factor is that more female students are enrolling in College today than ever before. We have seen evidence of this trend at Providence College where

almost half of our undergraduate students are female.

The School of Continuing Education has grown and should continue to grow. Many people whose previous college education was interrupted for various seasons seem now to be coming back to school.

The Graduate Program at Providence College has seen some fluctuation in its enrollment. While the number of students in the graduate program in Education has declined, those in the Master of Business Administration have increased.

There seems no doubt that competition for qualified college students will intensify in the years to come. Colleges which are to be successful, therefore, will have to know clearly what they are about, to recognize their limitations and to do very well, those things to which they are committed.

IV. ACADEMIC PROGRAMS

"The interest of students at the present time is very heavily geared to people oriented programs."

At the core of the undergraduate academic offerings is what is called the Development of Western Civilization Program. Fundamentally, what it attempts to accomplish is an integrated educational experience. It attempts to bring together in chronological fashion the key elements of ancient, modern, and contemporary western civilization. All students in their freshman and sophomore years participate in the Program in the Development of Western Civilization.

"Civ," as the students affectionately call it, is composed of elements of history, literature, philosophy and

religious studies. It also includes some discussions of art and music. It is a team-taught program whose faculty representatives come from each of the appropriate disciplines. Classes meet four times a week for lectures and a fifth time for smaller seminar sessions. Each of the faculty members on a particular team is expected to be present for the lectures of his colleagues. As a result, the Western Civilization sequence has proven to be a profitable learning experience, not only for our students, but even for our faculty. As indicated above, philosophy and religious studies have a very important role in the Western Civilization Program. The members of the Dominican faculty who have participated in this program have made a very valuable and positive contribution to its success. Father John Kenny, Chairman of the Department of Philosophy, has even published a book as a result of his participation in the Development of Western Civilization Program.

The traditional academic programs in history, English, the humanities, languages, and the hard and behavioral sciences still have areas of concentration in the P.C. curriculum. Student interest as well as professional opportunities change from time to time and curriculum revision must take cognizance of this fact. As a result, programs in studio art, music and theatre have been added.

Three other significant new programs have been added:

1. *Pre-Engineering*, began in 1974-75, with a basic "three-two" plan with the University of Notre Dame. Students spend 3 years at Providence, and 2 more years at the Engineering School of Notre Dame. Such students receive a Providence B.S. (Mathematics-Chemistry-Physics) at the end of the fourth year, and a B.S. in some Engineering field from the University at the end of the fifth year. Similar arrangements have been made with Washington University in St. Louis (1975-76) and Columbia University (1976-77). This program currently enrolls about 65 students.

2. *Public Administration*, is a program begun in 1975 for students interested in government careers. This is an inter-disciplinary program and is not a major. Departments involved are Political Science, Economics, Mathematics and Business. Students successfully completing this program generally take degrees in Economics or Political Science, with a special notation on their transcripts that they have qualified in the Public Administration Program. Currently there are about 65 students enrolled.

3. In 1979 we began a program in *Mathematics-Computer Science* which currently enrolls 18 students. It is interesting to note that as of 1 March, 1980, 63 applicants for admission to this program were listed

among the possible in-coming Freshman, as against 51 in Mathematics.

The interest of students at the present time is very heavily geared to "people oriented programs." As a result, there is a rapidly expanding request for additional offerings in such areas as psychology, sociology and social work.

Some traditional areas have diminished significantly particularly since they are very limited in their potential for future job opportunities. Programs to prepare students for teaching at the high school level have decreased. Only time will tell how long this trend will continue. Academic offerings in business and accounting have grown at a very rapid rate.

Significant shifts in the number of students served by the various departments took place between the years 1974 and 1978. Business, for example, showed a 63 percent increase, while Biology showed a decrease of 39 percent.

Some significant statistics regarding the number of majors may be noted:

	1976-77	1979-80	
Biology	282	184	-98 or 35%
Education	170	76	-94 or 45%
Special Education	90	95	+ 3
History	131	109	-22 or 17%
English	197	159	-38 or 15%
Political Science	381	342	
Chemistry	37	29	
Physics	8	3	
Business Accounting	393	431	+38
Management	427	428	
Finance	10	59	+49
Marketing	5	142	+137

The most significant growth has clearly been in Business Accounting, Marketing and Finance. The most significant declines have been in Biology and Education.

V. THE FACULTY

"Of the faculty at Providence College, 50 percent have earned doctorates. The national average of earned doctorates at colleges and universities in the United States is 47 percent."

At the present time Providence College has 217 full-time faculty members and 21 part-time faculty members. Of this number, 32 of the full time faculty members and 9 of the part-time faculty members are women.

There are 51 Dominicans who teach full time at P.C., and 6 who teach part time. Eight Dominicans are involved in the Administration of the College.

It has been the policy of the administration to encourage even those who are in administrative positions to continue to teach. Most of the members of the administration of the College, including the President, assume responsibility for the teaching of at least one course during the academic year.

Among the women members of the faculty, 3 are Dominican Sisters. All three of these Sisters have played a significant part in the adaptation of Providence College as a coed institution. Another Dominican Sister serves as Head Resident in one of the women's dormitories.

Of the faculty of Providence College, 50 percent have earned Doctorates. The national average of earned doctorates at colleges and universities in the United States is 47 percent.

For the past several years, successful attempts have been made to bring to the College Dominican Faculty, members from other provinces in the United States and other English speaking Dominicans from overseas provinces. During this past year, two of the brethren came here from the Province of St. Albert and one from the Province of Belgium. This faculty recruitment policy will continue in the future and hopefully even be expanded.

VI. AUXILIARY ACADEMIC FACILITIES

"Students, not only in business and in the hard and behavioral sciences, but also in the humanities, are making ever-increasing use of these educational tools."

The Phillips Memorial Library has current holdings in excess of 236,311 volumes. The Library also maintains membership in the Consortium of Rhode Island Academic and Research Libraries which makes it possible for our students to have accessible to them, the libraries of the various colleges and universities throughout the state.

The Phillips Library is also the repository for the collection of the papers of a number of outstanding statesmen. The papers of the late Congressman John E. Fogarty, who became most influential in legislation concerning social action, have now been professionally cataloged and are the resource for serious study concerning social legislation in the United States. Former Senator John O. Pastore, former senior Senator of Rhode Island, has given all of his papers to Providence College. These papers are an invaluable source of research since Senator Pastore has been most active, not only in social legislation, but also in the area of atomic energy research and control. It might be noted in passing that Senator Pastore was asked by Fr. Hesburgh, of the University of Notre Dame, if that institution might be the repository of his official papers. Happily for Providence College, Senator Pastore decided to give his collection to Providence College.

Expansion has also been made in the area of computer-assisted construction. The McGregor Computer Laboratory houses very sophisticated terminals for computer-assisted research. Students, not only in business and in the hard and behavioral sciences, but also in the humanities, are making ever-increasing use of these educational tools.

VII. JUNIOR YEAR IN EUROPE PROGRAM

"The students have the opportunity to not only study . . . but also to travel to many of the cultural centers of Europe."

For many years, Providence College has maintained what is called Providence College in Europe for those students in the junior year who wish to spend a year in Switzerland as part of their educational experience. Approximately 80 students usually participate in this program for either the whole academic year, or for one semester. The students have the opportunity not only to study at the University of Fribourg, but also to travel to many of the cultural centers of Europe.

The students live in the homes of the people in the Canton of Fribourg in Switzerland. It has been our policy to require that no more than 2 students live in any one home. Very quickly that students acquire a facility in either French or German and sometimes in both. Although they take courses at an educational consortium composed of Providence College and LaSalle College students, most of their courses are taken as students at the University of Fribourg. The program has proved to be most successful.

Special programs, on an individual basis, have also been worked out for students to study at the University of Bologna and also the University of Madrid. During the summer, a special program has been worked out for art students and others who wish to spend time studying art and related subjects in Italy. This program, which recently celebrated its Tenth Anniversary, has been designed to provide an opportunity to study art and art history as well as other allied subjects in Pietrasanta in Italy. Faculty members from Providence College have participated, and continue to do so, both in the program at Fribourg and at Pietrasanta.

Another student exchange program has been agreed upon with Kansai University in Osaka, Japan. One of our students spends his or her junior year at Kansai University, and a Japanese student spends the junior year here at P.C.

VIII. SEMINARY STUDENTS

"Bishop Gelineau of Providence has frequently expressed his sincere gratitude to the Dominicans for this great service to the Diocese."

For several years the students of Our Lady of Providence Seminary have been taking all of their academic courses here at Providence College. Opportunities are presented to these students to pursue courses to study in all majors offered by the College. Four of the Dominican priests teach as members of the faculty at Providence College. They also act as Advisors to the seminarians.

Special Programs of study have been arranged for the seminarians through discussions between the College and the Seminary itself. Bishop Gelineau of Providence has frequently expressed his sincere gratitude to the Dominicans for this great service to the Diocese.

IX. COLLEGE STUDENTS AND STUDENT-RELATED SERVICES

" . . . there is significant evidence that the present years of college students are given much more to the practice of their faith than one would find ten years ago."

College years are a time of intellectual, emotional and , hopefully, spiritual development for students. Besides the academic areas, therefore, others also become of great concern.

The Slavin Center provides a kind of focal point for student activity. Within the Slavin Center is located the Counseling Center. This comprises a staff of full-time Clinical Psychologists and other staff members. The Counseling Center provides opportunities for students not only to discuss their emotional growth and maturity, but also to seek information through the Placement

Center concerning the possibility of future careers. As the future job market narrows, increased emphasis must be placed upon planning for career opportunities.

The Chaplain's Office is also located in the Slavin Center. During the past year, Fr. Thomas Ertle has been the Head Chaplain of the College and has done an outstanding job. Dominican Fathers and Dominican Sisters also serve as members of Fr. Ertle's staff. The Chaplain's Office provides a very effective program of counseling for students. The Chaplain and his staff must also concern themselves with the liturgical life of the campus as well as the sacramental life of the students. While it is true that the students' college years are a time of questioning, searching and in some instances even protest, there is significant evidence that the present years of college students are given much more to the practice of their faith than one would find ten years ago. The liturgies are very well attended and Masses on Saturday and Sunday, particularly Sunday evenings, are frequently crowded to over-capacity.

Special liturgies have been held during the year at which the Dominican Community has been invited to participate. Such, for example, was a special Mass held on the occasion of Ash Wednesday and on the feast day

of St. Catherine of Siena. Students attended these liturgies in very large numbers and seem to have been most impressed by the beauty of the Mass and the recitation of Vespers as part of it.

The athletic programs at Providence College have continued to meet with success. This fact becomes even more significant when one considers that the number of scholarships offered to athletes at PC has not increased since 1951, with the exception of 8 scholarships which were added for women athletes. The men's hockey team participated in the ECAC finals this year and the women's basketball team participated in the AIAW National Tournament.

There is also a very elaborate intramural athletic program at Providence College. Over 2,500 students participated in this intramural sports program.

Students are also becoming more and more interested in the Theatre Arts Program at Providence College. During the past year a major theatrical production was presented about every six weeks. Most were outstandingly successful, such as the modern rock opera, "*Joseph and the Amazing Technicolor Dreamcoat*," which had to add two extra performances to its schedule.

As competition for admission to graduate and professional school becomes more acute, the College has tried to intensify its counseling and preparation efforts for students who are making application to these graduate and professional programs. Special advisors have been appointed to help prepare students for the board examinations in preparation for admission to Law School and Medical School. Special examinations are now also required by many of the business schools and we have attempted to prepare our students with special preparation.

As is quite obvious, the ancillary services of the College rendered to students must expand constantly in order to meet the growing needs. The College has attempted to keep current in meeting these requirements.

X. FINANCIAL POSITION OF THE COLLEGE

"We have operated on the principle that we must pay our bills. This we have done."

The total estimated worth of Providence College is approximately \$40,000,000. Its total long term indebtedness amounts to a little more than \$12,709,000.

The operating budget of Providence College for the academic year, 1979-80 was \$20,500,000. The projected operating budget for the 1980-81 academic year will be \$23,500,000. Our budgetary stability has been achieved without any diminution of the academic standards for incoming students or any compromise as to the qualifications of faculty members. During the past nine years, faculty salaries have been consistently increased and are now very competitive when measured by national standards for state and private colleges and universities.

One very significant element in the budget is scholarship assistance provided to our students. During the next academic year, Providence College will provide out of its operating revenue about \$1,000,000 in scholarship assistance for students. This amount does not take into account any funding from government or other outside sources. The ability of Providence College to provide such generous scholarship support is brought about mainly because of the contributed services of the Dominican Fathers. The endowment fund of the College is approximately \$5,000,000. Of this, little over \$2,000,000 is in the consolidated fund. We have tried in the past to put income coming from the consolidated fund back into the fund itself. We hope to do that again this year.

The financial situation of Providence College is stable. This situation has been accomplished only through a very concerted effort on the part of many people, particularly the Vice-President for Business Affairs, and the Treasurer. We have operated on the principle that we must pay our bills. This we have done.

One would be naive not to recognize that costs will increase and, consequently, great prudence must be used in planning for the future. We have tried to keep the cost of room, board, tuition and fees as low as possible. Next year the tuition cost will be \$3,942 per year and the cost of room and board will be \$2,550. The increase for next year was \$600 per year for tuition and fees and \$240 per year for room and board. Even with these increases, the tuition at Providence College is less than most comparable private schools in the New York or New England areas. Room and board are about the same as other schools like P.C.

If the College is to have continued success, its fiscal stability must also continue. Every effort will be made to bring this about.

XI. THE DOMINICAN PRESENCE AT PROVIDENCE COLLEGE

"In addition to their purely academic functions, several Dominicans live in dorms and are available to the students for advice, counseling and general support."

Every ten years all colleges and universities are reviewed by the appropriate regional accreditation association. Such an accreditation team visited Providence College two years ago. The following is a quotation from the Committee's report:

"The objectives of Providence College are clearly stated in its Bulletin. In brief, they are to provide the student a means of achieving his own intellectual growth and sense of values and enable him to develop skills that will provide him with opportunities for professional or career development and for making a contribution to the community in which he lives. To accomplish this, Providence College provides an educational program solidly based in the liberal arts, with an opportunity for the student to acquire some expertise in specific areas of study, and an extracurricular experience where personal interest in and support of the student is most important. The visit to Providence College enabled the Committee to further understand these objectives and assess the extent to which they are being fulfilled. What is not written in the Bulletin but is very obvious to a visitor to the campus is that these objectives gain force and uniqueness from the fact that Providence is a Dominican College. The academic program stems from the humanistic tradition of the Dominican Fathers, who base their study of the liberal arts on a foundation of philosophy and religious studies. To this tradition, in order to equip the student to live more effectively in the modern world, the Dominicans have added the study of the social and natural sciences and other career oriented fields. They reinforce their special commitment by their high visibility on campus. There are 79 Dominicans in either faculty or administrative positions. In addition to

their purely academic functions several live in the dorms and are available to the students for advice, counseling and general support. The Fathers look upon this personal relationship with the student as an integral part of their function. The students, in turn, accept and expect this."

As has been indicated above, the Dominicans presence at Providence College is strong. Not only do the Fathers and Brothers teach in the classroom but they also serve as Chaplains and Counselors to the students.

A very important apostolate continues to be carried on in the dormitories. It is here that much can be done in influencing the spiritual as well as the intellectual maturity of the students. Each of the men's dormitories has a Dominican Father or Brother as Rector of the building. The one exception is that Colonel DelCorso, by reason of his special position, serves as Rector of Raymond Hall. Many of the Fathers continue to live in the dormitories and this provides a very special dimension to dormitory life. There is much noise and nuisance to be put up with in dormitory living, but there is also the opportunity to make every corridor a parish. Even should a Dominican Faculty House be constructed at some future date, it would be most important to continue the presence of the Dominican Fathers in the dormitories.

There are also four Dominican Sisters who reside in the women's dormitories and they have helped significantly to enhance the Dominican presence among our female students. We hope that in the future, more Sisters will join us in this apostolate.

Providence College has always been very conscious of its obligation to be of service to both the Church and the civic community. Its record in both of these areas gives strong evidence that it has constantly attempted to fulfill this commitment.

There are at present, 75 Dominicans assigned to Providence College. Of this number, 5 are involved in particular individual apostolates, 8 are retired, and 4 are Cooperator Brothers.

In the future, it will be necessary to continue to train young Dominicans for the teaching apostolate. We hope that a significant number of them will consider Providence College as a possible area in which to exercise this very important work.

XII. ALUMNI

"The alumni are a source of great encouragement to the College and many of them give eloquent evidence of the great impact Providence College had upon their lives."

There are on record approximately 20,000 alumni of Providence College. Although the greater number of these alumni come from the New England area, large groups of alumni are also located in other geographic districts. There is a very significant number of alumni in the New York and New Jersey area. Thriving Alumni

Associations also exist in Washington, three areas of Florida, Chicago, San Francisco, Los Angeles and St. Louis.

By far the strongest Alumni Association is in the Rhode Island area. One-third of all of the physicians in Rhode Island are graduates of Providence College; one-third of the dentists in Rhode Island are graduates of P.C.; one-fourth of all of the lawyers in Rhode Island are alumni of P.C.; one-third of the State's teachers in secondary education are graduates of Providence College. PC takes pride in the fact that it numbers among its alumni one Governor of Rhode Island, two U.S. Congressmen, and numerous State and Federal officials. It also has at least four Bishops listed in its alumni roster.

Special programs are scheduled for alumni during the year and every attempt is made by the President of the College and members of the Alumni staff to visit the major areas of alumni concentration throughout the country. Even in years of the very tight economy, the alumni contribution to the College has significantly increased. This past year both the Alumni Homecoming Weekend and the Alumni Awards Ceremony had large numbers in attendance here on the campus.

XIII. PLANNING

"Planning for the future of the College will continue to be a most important obligation."

For the past several years serious attempts have been made to plan for the future of Providence College. A Planning Committee composed of members of the Administration, Dominican and lay members of the faculty and student representatives was established. It spent its first year reviewing and revising the various administrative offices of the College in accordance with the recommendations of the accreditation team which visited P.C. for its regular ten-year review.

During the past year, the Planning team reviewed, with the help of the appropriate departments and programs, about half of the academic offerings of the College. Specific recommendations were made for revision or change. The remainder of the academic programs will be reviewed during the next academic year.

The Academic Affairs Committee of the Faculty Senate has at the same time been reviewing the core curriculum of the College. Special Task Forces have also been set up to review and make recommendations of such areas as energy conservation, new academic programs, Dominican presence, enrollment, student housing, School of Continuing Education and Graduate Programs.

Planning for the future of the College will continue to be a most important obligation. Every effort will continue to be expended to meet this challenge.

XIV. THE FUTURE

"The students of the eighties must be taught something that is itself a great paradox. They must learn how to be free in a society that would try in so many ways to capture and manipulate them."

Those involved in higher education are called upon to look to the future and predict things to come. Depending upon the person or group to whom one goes for sage advice, the prophecy may be either painful or pleasant. Prophets of doom predict dire days for the future of Catholic higher education. Prophets of promise see nothing but sunny days for the Catholic college of tomorrow. Both cannot be right, but it would seem in all likelihood that neither will be entirely wrong. For one not to see future problems would be to miss the obvious. Perhaps it would be well to indicate just a few as well as some possible solutions.

One question that will have to be answered in the future is that of the size of enrollment. The best am-

bassadors of good will that any college can have are satisfied students and graduates. By "satisfied" is not meant students who pick and choose diversified value systems and make their own rules. By "satisfied" is meant students who have been challenged by an educational process that is both reasonable and demanding; students who have been shown continuing concern and personal concern by their faculty; students who have been shown how to see God in their neighbor and to share His love one with another. If Providence College can continue to turn out "satisfied students" in the truest sense of the words, its future enrollment picture may not be as dire as some predict.

The question of tenure continues to raise some problems. The faculty at Providence College is about 67 percent tenured. Some departments are as high as 87 percent tenured. Because of the tenure situation it is sometimes difficult at times to add young and talented new instructors to various departments and programs. The tenure problem is a national one, and it is one with which institutions of higher learning will have to grapple for many years to come.

Financial stability will have to continue to be a prime concern for Providence College. There are many areas where increased expenses can be anticipated. These areas include such things as faculty salaries, the cost of energy, the cost of food and maintenance. While it is likely that the cost of tuition will continue to rise somewhat during the next few years, the College must be careful not to price itself out of the market.

The obligation of energy conservation will become more and more imperative. We are now completing the installation of a computerized energy control system which should be of significant assistance in this area.

New and creative academic programs must continue to be developed and geared to the needs of changing times.

We are now and shall remain for some time in an age of legalism. In instances in which professors are denied either promotion or tenure, in cases where students are brought up on disciplinary matters, even when staff members are replaced, the practice has become quite commonplace for court proceedings to follow. At the present time Providence College is involved in three court cases. Colleges and universities all over the country are finding more and more that legal action has become part of almost ordinary college procedures.

Since the time of the tragic fire in 1977, PC has spent over a million dollars to improve still further its fire and life safety program. Even though at the time of the fire PC was in full conformity with all standards of the fire inspector, a decision was made by the administration of the College to go far beyond these standards. We have, for example, added two new staircases to Aquinas Hall and have installed a sprinkler system in the high rise dorm, McVinney Hall. In the future constant efforts will have to continue to be made to assure the safety and security of the campus.

The maintenance of the Dominican presence at Providence College must also be a continuing concern to us. As I have said, both verbally and in writing many times in the past years, it is my strong conviction that those Dominicans who have borne the burden of the day's heat and who have spent years of service at Providence College should be most welcome to remain here even after their retirement from the active faculty. They should be permitted to remain with dignity as members of the Providence College Religious Community. The fact that a number of Fathers who are now elder statesmen have made this adjustment very well is reassuring.

Providence College must encourage younger Dominicans to enter the teaching apostolate and, as has been mentioned above, to consider Providence College as their field of operation. Special training must be provided, not only in the formal academic areas, but also in such areas as counseling and pastoral guidance.

The students of the eighties must be taught something that is itself a great paradox. They must learn how to be free in a society that would try in so many ways to capture and manipulate them. They must at the same time be taught to be responsible in a society that seems to encourage all to be permissive. It has been said with good reason that those who do not have a sense of history will be forced to repeat its mistakes. Consequently, a school must teach tradition to its students. This in the eighties will be a particular difficulty, when young people more

and more are encouraged by some elements to create history rather than to learn it. Education is meant to humanize people and, consequently, an appreciation of the values of the past is important. Students must be given an appreciation of literature, of music, and of the arts. They must be provided with the opportunity to examine some of the great questions which people of the past have asked and to evaluate some of the responses. They must be challenged to know values and to live them in their lives, and I believe strongly they should also be taught the emptiness of a world that would try to exist without its God.

In time, in the future, Providence College will continue to be an institution burdened with complexity and blessed with apostolic challenge. During more than three score years she has gathered around her students for whom the words of her Alma Mater ring true:

"Our lives shall thee with noble deeds adorn."

Please God for many years to come she will continue to do so.

Respectfully submitted,

Thomas R. Peterson, O.P.

Thomas R. Peterson, O.P.
President
Providence College

Gavitt nonetheless got great competition and exposure throughout the country, which at least offset partly the disappointment of not going to Moscow.

Little Isiah Thomas, who will be a sophomore at Indiana this year and the darling of this Olympic team, said he probably wouldn't have even tried out if the squad was going to Moscow. Last summer he was a member of the gold medal winning USA Pan-American Games team.

"You can't replace the gold medal," said Thomas. "I was on the victory stand in Puerto Rico. I know how I felt when they placed the medal around my neck. They can't replace that, no matter what they give us. But, in a basketball perspective, you can't beat this competition (playing against the pros). Without a doubt, they're the best players in the world. And I'd rather be in LA or New York any day than in Moscow. I don't

think I would have tried out if we were going to go to Moscow."

So, while there was some disappointment and even some bitterness about the boycott and not going to the Olympics, Gavitt and his staff and the Olympic basketball people still gave those who really wanted it, a chance to be an Olympian and to play against the best.

"Now that everything is over," said Gavitt, "it's easy to say we would have won the gold medal. But I don't think I have to be too concerned about being objective or fair — I'm going on the basis of what I saw and how our team responded and everything tells me we would have brought home the gold."

"The kids we had were so unselfish. A special kind of feeling developed among them in a short period of time. They were all very positive, very upbeat the whole way. We never had a bad day of practice."

"I know," added Gavitt, "all the kids felt like Olympians and were proud to wear USA across their chests. And I know I felt like the Olympic coach. I was damned proud to represent my country."

"It was the biggest thrill of my life."

Former New England Collegians applaud the U.S. Olympic Team during an exhibition game held at Alumni Hall on June 4th. The Olympians defeated New England 104-89.

LADY FRIARS TENNIS: TALENT AND DETERMINATION KEY TO FIRST POST-SEASON TOURNEY

*Written by Lisa Gilbride,
Coach-Lady Friars Tennis Team
Assistant Coach-Women's Basketball*

Overshadowed by the successes of the nationally ranked basketball and ice hockey teams (women's of course), the lady friars tennis team plodded along in relative obscurity. Yet public attention is not always a prerequisite for success, and captains Maryann McCoy and Sue Hubbs led a contingent of talented and determined teammates to the most successful year in the history of women's tennis at Providence. The team's unprecedented 19 and 4 record, was highlighted by first time victories over the University of Connecticut, Boston College and the University of Rhode Island. These statistics alone would be sufficient to make any season a success. However, the outstanding play of veterans Paula Hebert and Diane Desaulniers, and freshmen Nancy Curtin, Linda

Maryann McCoy

Duchaine and Ann Marie Mancini, in addition to captains Hubbs and McCoy earned the lady friars their first trip to a post season tournament.

"I never dreamed we'd get this far," Sue Hubbs, co-captain from Dixon, IL, explained. "When I first came to Providence, the team was barely breaking five hundred, and now we are one of the top teams in the East."

This proved to be no exaggeration, as the team traveled to Towson State University in Maryland for the EAIAW Regional Tennis Tournament. There the lady friars matched volleys with women's teams from all over the East coast. The unheralded lady friars were the surprise team of the tournament, defeating Seton Hall, Lehigh, Towson State, and Springfield. Ultimately, they took second in the tournament and earned a berth as a representative of the eastern region at the AIAW national championships at California State in Los Angeles.

In California, the New England winters finally caught up with Coach Lisa Gilbride's troops from Rhode Island, as they faced year-round tennis schools from California and Florida. The lady friars were early casualties in the main tournament. However, they defeated both Minnesota's St. Cloud and Colorado College in the consolation draw to give them sixteenth place overall in the first try for a national title.

"It was a tremendous experience" according to freshman Linda Duchaine of New Bedford, "The whole year was great, but the nationals made me realize just how much we had accomplished. I'm really looking forward to next year."

Coach Lisa Gilbride was elated but not overawed by her team's performance. "These kids worked very hard all year for every point they won. Where they were short on talent they won on hustle and desire. No, I'm not all that surprised by their record. They're a team of winners. I'm very proud, though."

The lady friars will begin a 25-match season on September 20th.

Sue Hubbs

that includes the University of New Hampshire and Brown. It should be another good year. Maybe this time the stands will be filled.

RECRUITMENT '80: TEAM COACHES CONFIDENT IN NEW ATHLETES

It's the hottest topic among alums and fans. Almost everyone is talking about it, in the office, at parties and on the streets. Recruiting!

As soon as it begins to get chilly, the rumors start to fly. They continue until the spring, or until announcements are made.

Well, everything is cool at the moment. Things won't get heated up again until late fall or early winter. Now, everyone is waiting to see if the latest crop of recruits — at Providence College and everywhere else — is as good as everyone thought, or as good as the press clippings have indicated.

If you talk to the coaches at this time of the year, any coach will tell you that he or she is happy with the way things have gone and happy with the newcomers who will be freshmen in September.

At PC, everyone seems happy. Gary Walters, the basketball coach, and his staff, are more than pleased with seven new recruits. Hockey coach Lou Lamoriello is happy, too. So is Tim Gilbride, the women's basketball coach, as well as baseball coach Don Mezzanotte.

Obviously, the basketball recruits are the most talked about and the most written about. This winter Walters will have what pretty much amounts to two different teams — his five starters of a year ago who return, plus the seven incoming freshmen and Jim Panaggio, a 6-3 junior guard who is eligible after transferring from Dartmouth and sitting out a year.

"We expect the newcomers to push our veterans for starting positions," said Walters. "This should create a healthier and more competitive situation, something we didn't have a year ago."

"And we expect some of our newcomers to play a lot and be of immediate help. Just who they'll be is hard to say at this time. We won't be able to determine that until we see them in practice and find out just who is ready," added the coach. "But we're happy with who we have. Wayne Szoke and Steve Hocker, my two assistants, did an outstanding job. We feel that all of their hard work and long hours will pay dividends."

All of the recruits come highly recommended and made the normal and typical "all" team (See box on this page).

Lamoriello said "we were able to fill voids left by our graduating seniors, but we did not recruit to take jobs away from our present players."

PC hockey was 21-11 last year, its winningest season ever, and Lamoriello has all but four players back from that team. So, the Friars don't need as much immediate help as does basketball.

Among those coming in hockey are Gates Orlando, a forward from LaSalle, Quebec; Mario Proulx, a goalie, and Jacques Delorme, a defenseman, both from Drummondville, Quebec; John Ciotti, a forward

from Simcoe, Ontario; Bill Colville, a forward from Toronto; Steve Taylor, a Rhode Island All-Stater from Cranston East; and Paul Bauer, whose brother Tom was a four-year star at PC and graduated two years ago. He's from Bloomington, Minn.

The baseball team should get some immediate help from three pitchers — left-hander Mark Ricker, who helped lead Lynn (Mass.) English to the Massachusetts state championship; Dennis LaCross from Fitchburg (Mass.) High; and Scott Posers, a 6-5 right-hander from Tiverton (R.I.) High who helped lead his team, both on the mound (just one loss) and as an outstanding hitter, to the finals on the state tournament.

Mezzanotte can also turn to Art Dromerhauser, a catcher-first baseman-outfielder from Bayshore (N.Y.) High; Ken Leahey, a shortstop from Bishop Hendricken (R.I.) High;

and Bill Gorgone, a third baseman from Smithfield (R.I.) High.

As far as the Lady Friars, the best of all may be Kathy Finn who, at 5-9, scored 1,976 career points at New Jersey's Mater Dei High School. She led Mater Dei to the state championship last year and scored a whopping 73 points in one game.

Also coming are 6-2 Laurie Buchanan from Bridgeport's Notre Dame High School. She's the sister of Maryellen Buchanan '79, who was PC's first 1,000-point scorer.

The third new Lady Friar will be Laurie St. Jean, a guard from Putnam (Conn.) High, who scored 1,430 career points and had 51 points in one game.

So, from all indications, it's been a banner year for both the Friars and Lady Friars. All that's left is to see just how good they all are and just who will contribute immediately.

Facts On Future Friars

Here's a list of the basketball newcomers; their positions, heights, weights, high schools, averages and the other schools they finally considered before deciding to become Friars.

MARLON BURNS, 6-8, 205, Forward, Dartmouth HS, South Dartmouth, Mass., 21 pts., 13 rebs., 1191 career points. St. Bonaventure and Syracuse.

JIM CHOLAKIS, 6-5, 185, Guard-Forward, Albany HS, Albany, N.Y., 15 pts., 7 rebs. Yale, Penn, St. Bonaventure, Siena.

SEAN CANTY, 6-7, 215, Forward, Tabor Academy, Dover, Mass., 24.5 pts., 16.5 rebs. Boston College, UConn, Fairfield, New Hampshire, Maine.

CARL HILL, 6-1, 170, Guard, Princeton Day School, Trenton, N.J., 16 pts., 8 assists. Maryland, Wake Forest, Wichita State.

GEORGE JACKSON, 6-5, 190, Forward, John I. Leonard HS, West Palm Beach, Fla., 21.5 pts., 14.5 rebs. Purdue, Vanderbilt, Florida.

MYLES McPARTLAND, 6-7, 190, Forward, Carle Place HS, Westbury, N.Y., 24 pts., 17 rebs. Rhode Island, Manhattan.

JIM PANAGGIO, 6-3, 175, Guard, Cardinal Mooney, Brockport, N.Y. A transfer from Dartmouth College who will be a junior and eligible to play this season. He was the second leading scorer, and first in assists, as a sophomore starter at Dartmouth two years ago.

OTIS THORPE, 6-9, 225, Center, Lake Worth HS, Boynton Beach, Fla., 21 pts., 19 rebs. UNC-Charlotte, New Orleans, Louisville.

ALUMNI NEWS

NEW ALUMNI DIRECTORY SLATED FOR FALL '81

NAT'L ALUMNI BOARD MEMBERS TAKE OFFICE

In May, ballots for the Alumni Association elections for the 1980-81 Board of Governors were mailed to all Alumni on active status. The ballots were counted on June 28th and the following slate of Alumni leaders officially took office on July 1, 1980.

James F. O'Connell M'42, a retired thirty-year-veteran special agent of the F.B.I., has assumed the presidency of the National Alumni Association for the 1980-81 fiscal year. A resident of Yarmouthport, Mass., Jim has a long record of volunteer service on behalf of Providence College. This past year he held the post of vice president of the Alumni Association and prior to that he served a three year term on the Alumni Board of Governors. During his career with the F.B.I. in New York City, he served in practically every leadership capacity for the New York Area Alumni Club including several terms as president of that organization.

In the current role of vice president and then automatically succeeding to president for 1981-82 is Wally Tasca '40 of Cranston, R.I. Secretary and Controller for Tasca Lincoln-Mercury, Wally has been a Class Agent since his graduation and is a former elected member of the Alumni Board. For the past three years he has been an associate chairman of the Loyalty Fund and he continues as a member of the Mal Brown Alumni Chapter Board of Directors. In 1977 he was the recipient of the Alumni Association's award for "Distinguished Service."

Joseph C. Flynn, M.D. '61, a resident of East Greenwich, R.I. is the new secretary of the Association. Joe is a specialist in Obstetrics and

James F. O'Connell, M'42

Gynecology and is affiliated with the College's student health office in addition to his regular practice. From 1976 to 1978, he was Co-Chairman of the Chancellor's Club division of the Loyalty Fund drive and he has also worked on several other Alumni projects including the travel program and class reunion committees.

The office of treasurer is now held by Cynthia Kranich Altieri '76 of Hamden, Connecticut. Cynthia is an accountant for Waterbury Hospital. She is a past secretary of the New Haven Area Alumni Club and served on its scholarship and Veritas award committees.

Three people are serving three year terms as newly elected members of the Alumni Board. Representing the classes from 1938 to 1942 is Howard A. Kenny D'42 of Providence, R.I. Howard is a Network Supervisor for the New England Telephone Company. Robert P. Mathieu '50 of Pawtucket, R.I. is representing the classes from 1948 to 52. A leading authority in the health care field, he is currently Director of the R.I. Management Task Force. Paul M. Lenahan '72, as Assistant Vice Presi-

The Providence College Alumni Association has selected the Bernard C. Harris Publishing Company of New York to produce a new directory of living alumni. The Harris Company published the first P.C. Alumni directory in 1974 and is the oldest and largest exclusive publisher of alumni directories in the world.

As with the previous two editions of the P.C. Alumni Directory the extensive project will be undertaken at no cost to the college. The Harris Company will compile, publish and market the directory financing the operation solely through the sale of individual directory copies restricted to alumni alone.

Although the college will not benefit financially from the directory sales the project will be of tremendous value in updating alumni records and in planning alumni activities and programs. *Purchase of the directory should not be considered as a contribution* since all sales income goes direct to the publisher.

The main body of the directory will consist of an alphabetical listing of all alumni, with each entry to include name, class, home address and telephone, and business or professional information, including title, firm name and address, and telephone. Two complete indexes of all alumni, one arranged geographically by towns within states, and the other by class year will follow the main listings.

This updated material will be derived from brief questionnaires mailed to all alumni with known addresses and followed up by telephone for verification, and at that time only, alumni will be invited to purchase a copy of the directory if they so desire. Only enough directories to fill these pre-publication orders will be printed, and circulation will be restricted to alumni. Release of the directory is tentatively scheduled for Fall 1981.

ALUMNI ASSOCIATION continued

dent of Industrial National Bank, represents the classes from 1968 to 1976. Paul is a resident of North Attleboro, Mass.

The newly elected Board members join other members who are still serving terms as representatives of various class groups. These members are: Francis J. McLaughlin '36, William Brennan, D.M.D. '56, Susan McCutchan '75, Ralph Pike, M.D. '45, Dominick B. Schioppo, M.D. '58 and Robert Paci '64.

Rev. John Kenny, O.P. '31 continues as Chaplain of the Alumni Association and Robert E. Finneran '53 continues on the Board for a one-year term as immediate past president.

When the new Alumni Board holds its first business meeting, between three and five additional people will

be appointed to serve one-year terms as area representatives which will bring the total size of the body to a minimum of 17 members.

The official kick-off of the 1980-81 Alumni Program, and the Loyalty Fund Drive is scheduled for October 18, on the college campus.

**JOHN J. PARTRIDGE '61
NAMED TO PC CORPORATION**

John J. Partridge '61 of Pawtucket, Rhode Island has been elected to serve a three-year term as one of the Alumni Association representatives on the Corporation of Providence College.

An agent for the Class of 1961 since his graduation from P.C., John is a former Secretary of the Alumni Association and has served on the Law School Study Task Force and the Alumni Awards Committee.

He is a graduate of Harvard Law School and a partner in the Providence law firm of Tillinghast, Collins and Graham. Among a long list of civic and professional activities he is currently chairman of Common Cause of Rhode Island and a Trustee of the Providence Preservation Society.

John J. Partridge '61

CALLING ALL ALUMNI

In an effort to help undergraduates decide on careers, the Providence College Counseling Center is about to launch **PROJECT CONTACT**, a program designed to put students in touch with alumni who are working in various occupational areas.

If you are willing to serve as a contact person in your area of professional specialization, please complete the form below and return to: Jacqueline Kiernan, Counseling Center Director, Slavin 210, Providence College, or call (401) 865-2343 for more information.

ALUMNI PROFILE

ON THE LIGHTER SIDE

by Ellen Harrington '83

As 1980 ticks away into history, most of us are just shaking our heads. At the Presidential race. At the state of international affairs. And most of all, at oil prices. As the winter approaches most Americans are becoming concerned with the skyrocketing prices of gasoline and home heating oil.

But some people don't need to worry—people like Jim Bier '61. He doesn't worry about his home heating bills because he doesn't have any—he just waits for the sun to come up in the morning.

Bier, his wife, and their four children live in Ferrum, VA, in a solar home that Jim designed and built himself. While teaching at Eisenhower College in Seneca Fall, NY, Bier became increasingly interested in the problems of home heating and the conservation of natural resources. "My own wrestling with solar energy problems led me to decide that passive solar energy was the only cost-accessible way to go," said Bier.

Though solar energy has gotten off to a slow start in the U.S., passive solar has become a major building trend in implementing solar energy. In the passive system, solar energy is allowed to move by natural means, such as radiation, convection and conduction. A passive solar building will often collect its solar energy through a large south-facing window area which is protected from the summer sun by a roof overhang. The energy is stored in the roof and walls of the house itself. When arranged properly in relation to the sun, the passive solar system functions automatically, with little or no management. In contrast, active solar energy systems use collectors consisting of glass covered shallow boxes through which air or water is piped, in order to collect solar heat and transfer it to the house or to a storage tank of rocks and water.

Rejecting some typical forms of passive solar energy in house plans as too costly or less efficient, Bier designed a system of five louvres which span the front of the 1,300 square-foot house. The rectangular louvres resemble large cinderblock pillars reaching from the floor of the downstairs of the home to the ceiling of the upstairs.

They are painted black and angled to permit the sunshine to enter directly through the glass front of the house in the morning and absorb the rays in the afternoons. Heat is then released in the evenings when the temperature of the house begins to fall. The walls of the house also are made of masonry blocks, and their cores are filled with sand to help store heat.

The Bier Home

- 1,300 square feet
- \$14,500 plus three summers work
- Assessed value \$40,000
- 1978-79 used 1,370 pounds (less than ½ cord) wood as back-up energy; equivalent to 69 gallons fuel oil
- No summer cooling

Even the family dog, Penny is getting into the act. Bier has built her a solar doghouse with panels on the roof to collect the sun's heat.

According to Bier, "... we have answered over 100 calls about solar energy and have had close to 300 people come through our house. I've also given talks to community groups and state associations as well as presented papers at scientific and solar conferences."

Bier has received much local and national attention, including a letter from Senator Virgil H. Goode of the 20 senatorial district of Virginia which said, "Everyone should be impressed by the heating costs that you got by on this winter. Actions such as yours are what is needed to make us an independent energy country."

As Bier points out in an article published in *The Ferrum Review*, Spring '77, "we will be seeing much more of these unusual ways of harvesting and harnessing the sun's energy, not so much on account of their being inexpensive, but primarily because those sources of energy we've come to depend on so heavily in the past 30 to 40 years, oil and natural gas, are rapidly becoming scarcer and more expensive."

In 1978, Bier along with neighbors, founded the Whetstone Branch Living School, a non-profit organization designed for homeowners who wish "to

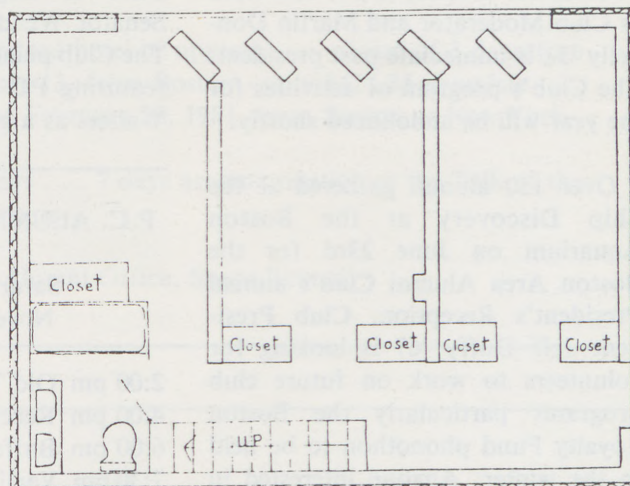

C. James Bier, a native of Bent Mountain, Va, was graduated from PC in 1961 with a B.S. in Chemistry, and received his doctorate in Biophysical Chemistry from the Massachusetts Institute of Technology. He has held teaching positions at the University of North Florida, Eisenhower College in Seneca Falls, NY and Hollins College. Presently, he is an Assistant Professor of Chemistry at Ferrum University, Va, and a nationally recognized solar energy designer.

Passive Solar Home, designed and built by Jim Bier '61.

develop and share appropriate technologies for productive and ecologically sustainable lifestyles." The Living School encourages homeowners to share information through formal instruction, workshops, individual consultation and hands-on experience.

FIRST FLOOR

SECOND FLOOR

BASICS FOR A COMFORTABLE LOW-COST PASSIVE SOLAR HOME

Include thermal mass by using massive solar building materials exposed to the living space.

Make much of the south wall of fixed double pane glazing shaded by an overhang during the summer.

Provide movable insulation for the south window area.

Use double-glazing plus storm windows on East, North and West sides.

Provide an effective thermal blanket of insulation on the outside of the massive structure.

Locate garages or workshops on the North and/or West sides.

Insulate below ground to R 15-24 to the frost line and R 5-12 from there to the base of the footings with extruded (blue) styrofoam.

PASSIVE SOLAR INTERVENTION

VERTICAL SOLAR LOUVERS (VSL) are a set of solar energy absorbing and storing masonry surfaces oriented on a SE-NW plane immediately behind Southfacing glazing. VSL permit maximum solar penetration into the building in the morning to allow rapid heat-up and maximum participation of building components and contents in energy storage. During the day, as the sun proceeds across the sky, a higher and higher fraction of the solar energy is collected and stored in the VSL elements to prevent overheating of the space and to provide later release of the energy stored in the VSL column for nighttime use.

(Ellen Harrington is a sophomore at Providence College and is a native of New Bedford, Mass. She has written for the New Bedford Standard Times, a daily newspaper owned by the media giant, Dow Jones. This is her second article for PROVIDENCE publications.)

AREA CLUB NOTES

* The Greater Providence Area Chapter of the Alumni Association, better known as the Mal Brown Club, has a new slate of officers for 1980-81. They are: President - Edward F. Donnelly '32; Vice President - Muriel Vassett '71; Treasurer - Mary Ellen Woodmancy '75; Secretary - Joseph Carty, Jr. '69. Board of Directors: Joseph McCabe '47; Wallace Tasca '40; Edward Corbett '49; Kathleen Moretti '73; William Lynch '28 and Paul Fox, Jr. '74. Rev. Thomas A. Collins, O.P., continues as Club Moderator and Martin Donnelly '51 is immediate past president. The Club's program of activities for the year will be announced shortly.

* Over 150 alumni gathered at the Ship Discovery at the Boston Aquarium on June 23rd for the Boston Area Alumni Club's annual President's Reception. Club President Jeff Duffy '67 is looking for volunteers to work on future club programs particularly the Boston Loyalty Fund phonathon to be held in the winter. Anyone interested in taking an active role in the Boston Area Alumni Club should send his or her name/address/telephone number to Jeff, c/o Alumni Office at PC.

* The Washington Area Alumni Club has a new slate of officers. James P. Carty '61 of Alexandria, VA, will serve as president for the next two years. He is an attorney and vice president of the National Association of Manufacturers, the largest such group in the United States. The other officers elected were: John Motley '76, secretary/treasurer. John is Managing Director of the National Federation of Independent Business and Dave is Legislative Assistant to Senator Wendell Ford of Kentucky. The Club plans to have a Fall meeting featuring PC basketball coach Gary Walters as a guest speaker.

P.C. ALUMNI HOCKEY GAMES

Saturday afternoon
November 8, 1980

2:00 pm Old Timers Game
4:00 pm Recent Grads Game
6:00 pm Buffet for Former Players
7:30 pm Varsity Team vs. Merrimack

For more information, call Bob Bellemore at (401) 865-2279.

The New York Area Alumni Club recently held an organizational meeting and a full slate of activities for 1980/81 will soon be mailed to area grads. This year the Club will be led by a new slate of officers which includes: Thomas Farley '68, President; David J. Tubridy '46, Thomas Baker '53 and Maurice Paradis '58, Vice Presidents; and David Tubridy Jr. '74, Secretary/Treasurer. The Board of Governors consists of Gerald Hughes '68, Kevin Leahy '74, Diedre Ertle '76, Wilfred Blanchard '53, Robert Murphy '25 and Dr. David Carberry '47. Mr. Gerald Driscoll '27 and Alfred Blake '36 will serve on a special Senior Advisory Board.

The Alumni Association is sponsoring a "President's Night" dinner on Cape Cod on Saturday evening, October 25th at the Coonamessett Inn in Falmouth, MA. The guest of honor will be Very Rev. Thomas R. Peterson, O.P. James F. O'Connell M'42, president of the Alumni Association will serve as toastmaster. All Alumni are invited to attend. Tickets are \$11.00 per person and can be obtained by contacting the Alumni Office.

MORE INFORMATION ON ATHLETICS?

Do you want to get more information on PC basketball in the BIG EAST? More info on recruiting? How about more info on PC's playoff hockey team, or cross country which hasn't lost in 68 dual meets? Or about the Lady Friars, perhaps the best in New England? Do you want more stats, or schedules, or outlooks?

Then you'll want to subscribe to the PC Athletic News. You'll get three newsletters, the basketball and hockey yearbooks and brochures on all of PC's athletic teams during the year beginning in September. The cost for all of this is just \$10.00. Simply send your check with this order form to the Sports Information Office, Providence College, Providence, R.I. 02918.

1973

John J. Wright was recently married to Margaret F. Kane.

Victor Forni is currently the assistant director of the Spokane, Washington Community Action Program.

Kevin P. McMahon has been named as an assistant state's attorney, prosecuting arson cases in New Britain, Conn.

Richard J. Silva was recently married to Angela L. Pacheco.

1974

David J. Cormier is working as an executive recruiter for the firm of Robert T. Guard and Associates, Inc. in Honolulu, Hawaii

William P. Norton, Jr. was recently married to Martha M. Chapel.

Paul G. Wielgus has been named a credit officer at Rhode Island Hospital Trust National Bank in Providence, R.I.

Peter P. Fenton was recently graduated from New England School of Law. He is the assistant director of the Victim Witness Program for the Hamden County District Attorney's Office in Mass.

Fred Treseler has been appointed assistant track coach at Boston College. He is also a teacher of English at Dedham High School in Mass.

Thomas M. Griffin, Jr. was recently married to Gwynne Alison Rec. He received a Juris Doctor degree from Loyola of New Orleans School of Law and is assistant clerk of the New London Superior Court.

1975

Joseph R. Weisberger, Jr. was recently married to Gail Friedemann '78.

Arthur M. Sparano was recently married to Deborah M. Ward.

Shawn L. O'Sullivan graduated cum laude from Western New England School of Law in Mass. He recently passed the Conn. bar exam and has been admitted to practice law in that state.

Bruce Tavarozzi was recently married to Maria E. Sepe.

James J. Joyce has been elected a credit officer at Rhode Island Hospital Trust National Bank in Providence, R.I.

Anthony D. Buonanno was recently married to Virginia Hindle.

William Candon was recently married to Kristin Foster.

Mary E. Corbett recently received her Juris Doctor degree, magna cum laude from Boston College Law School where she was a member of the Law Review. She is now affiliated with the law firm of Lyne, Woodwarth and Evarts in Boston, Mass.

Dr. Kenneth J. Morrissey, Jr. was recently married to Myrto Mioni '77. She is a special education teacher at the Dr. Zambarano Memorial Hospital and her husband is now on staff at R.I. Hospital.

Kim S. Nolan has been appointed sales representative for McLean Trucking Company, Brockton, Mass.

Judy M. Colabella received the Doctor of Osteopathy degree from Kansas City College of Osteopathic Medicine.

1976

Edward Guadagnoli was recently married to Nancy A. Soboleski.

Dr. Nancy C. Shea was recently married to Kim M. Clark, Esq. She will begin a residency in psychiatry at George Washington University Hospital.

Thomas R. Carver received the degree Doctor of Medicine from St. Louis University, Missouri.

Paul Y. Courtney has been promoted to general sales manager of WHUE Radio in Boston. He is married to Judith Elias '75 who is employed as an advertising copywriter for the Zayre Corporation in Mass.

Mark Forcier '76 and **Mary Beth Hultquist '77** were recently married and are now living in Dallas, Texas.

Deborah Delasanta-Guernon has been appointed English department chairperson at Mount Saint Charles Academy, Woonsocket, R.I. She is the first woman to hold that post at the academy.

Patricia DesRoches was recently married to Alan E. Dion.

Dennis Mullen was recently married to Annmarie Patonis.

Anthony R. Ricci and **Patricia A. Coccozza '77** were recently married.

Thomas R. Carver has been awarded a Doctor of Medicine degree from St. Louis University. He will take his residency in obstetrics-gynecology at Loyola University Hospital in Maywood, Ill.

Rev. Bruce W. Collard has been ordained to the priest hood in the Diocese of New Hampshire.

Joseph J. Grant has been awarded a Doctor of Optometry degree by the Illinois College of Optometry.

Beverly J. Anarumo has received the degree Doctor of Osteopathy from Philadelphia College of Osteopathic Medicine.

Nicholas J. Turilli has received the degree Doctor of Osteopathy from Philadelphia College of Osteopathic Medicine.

Robert D. Watkins was recently married to Rosemary P. Thorn.

Michael G. Fogarty received the Doctor of Osteopathy degree from Kirksville College of Osteopathic Medicine in Missouri. He will intern at the Naval Regional Medical Center in Oakland, Calif.

David J. Lenkerwicz has received the degree Doctor of Chiropractic Medicine from the National College of Chiropractic in Chicago.

1977

Carol E. Saccucci has been awarded the degree of Juris Doctor from Vermont School of Law.

Bruce M. Soares has received the degree Juris Doctor from Case Western Reserve University. He will be associated with the law firm of Black, McCusky, Soares and Arbough in Canton, Ohio.

Michael T. Sullivan has received the degree Juris Doctor from Fordham University School of Law. He will serve as law clerk for the Honorable Francis J. Boyle of Rhode Island.

Vito L. Sciolto has received the degree Juris Doctor from Suffolk University Law School, Mass.

Steven A. Moretti has received the degree Juris Doctor from Suffolk University School of Law, Mass.

Marilyn F. McGair has received the degree Juris Doctor from Suffolk University Law School, Mass.

Kathleen A. Oliveira has been appointed assistant to the director of admissions at Lesley College, Cambridge, Mass.

Rebert P. Childs was recently married to Elizabeth Regine.

Christopher Bishop has received the degree Juris Doctor from McGeorge School of Law, University of the Pacific, Sacramento, Calif.

John M. Sweeney was recently married to Susan M. Dunn.

Cecile L. Benoit was recently married to William Macomber. She is a chemist at Teknor Apex, Co., Attleboro, Mass.

Rev. Mr. Stephen J. Avila was ordained a Deacon at the North American College in Rome, Italy.

John T. Capetta was recently married to Julie Ann Pulito.

Allen N. Joseph has been commissioned a second lieutenant in the U.S. Air Force and will now go to North Carolina State University.

1st Lt. Joseph D. Lofgren U.S.A. was recently married to Jacqueline Guerra.

J. Michael Saul has been appointed a credit officer in the Rhode Island Hospital Trust National Bank Loan Division in Providence, R.I.

Dennis J. Carvalho has been promoted to senior accountant for Price Waterhouse and Company in the Providence, R.I. office.

Joseph F. Lowney has recently received the Doctor of Osteopathy degree from Philadelphia College of Osteopathic Medicine.

1978

Marion Kaufman has received a master's degree in family and marriage counseling from Virginia Commonwealth University School of Social Work.

Terrence X. Meyer was recently married to Joan Marzullo.

Robert Tracey was recently married to Cynthia Lemeir.

Michael S. Nelson has been appointed a sales representative for McLean Trucking Company in the Hartford-Springfield area.

Valerie M. Pezza has been elected to serve as treasurer of the R.I. Chapter, Leukemia Society of America, Inc.

Debra L. Martin was recently married to Denis Boulanger.

Ruth Oakley is entering the Order of Sister Servants of the Immaculate Heart of Mary.

THE 1980-81 SEASON OF THEATRE AT PROVIDENCE COLLEGE

WORKING

October 17-19, 24-26

From the magical genius of Stephen Schwartz (PIPPIN, GODSPELL) comes a new upbeat musical that makes holding down a job fun again! Based on the best selling book by Studs Terkel.

SHE STOOPS TO CONQUER

December 3-7

Robust humor and fantastic deceptions combine in Oliver Goldsmith's classic comedy. A delightfully eccentric 18th century English romp!

A STREETCAR NAMED DESIRE:

February 27-March 1, March 6-8

The Pulitzer Prize-winning play by Tennessee Williams. A tragic and effective drama which ranks as one of the greatest in American Theatre!

ROYAL GAMBIT

April 29 - May 3

“Original, stimulating and mature . . .”
 N.Y. TIMES. A refreshing new look at the life of King Henry VIII and his six wives. Written by Hermann Gressieker and translated by George White.

PLUS! An additional subscriber bonus!!

A special presentation of a recent Broadway comedy or musical will be performed on February 6-8 (Parent's Weekend) and 13-15 (Alumni Weekend). As a Season Ticket Holder for our regular season, you can see this play free!

Plays being considered for this event are SAME TIME, NEXT YEAR, VANITIES, or I DO! I DO!

Further information on this production will be sent from the Office of Special Events and the Alumni Office.

HON.

Barnaby C. Keeney

“Farewell to you and the youth
I have spent with you.
It was but yesterday we met in
a dream.
You have sung to me in my
aloneness, and I of your
longings have built a tower in
the sky.
But now our sleep has fled and
our dream is over, and it is no
longer dawn.
The noontide is upon us and
our half waking has turned to
fuller day, and we must part.
If in the twilight of memory we
should meet once more, we
shall speak again together and
you shall sing to me a deeper
song.
And if our hands should meet
in another dream we shall build
another tower in the sky.”
